disproportionately higher rate of accidents than urban areas. It was discovered that roughly 40% of fatal traffic accidents happen on rural roads while only 20% of the US population lives in rural areas.

### **STAAD.Pro Building Design Manual NWatch: Frequently Asked Questions**

**Q: What is STAAD.Pro Building Design Manual NWatch?** A: STAAD.Pro Building Design Manual NWatch is a powerful tool that integrates with STAAD.Pro software to provide code-compliant design checks and calculations based on various international building codes, including ACI for concrete design, AISC for steel design, and NDS for wood design.

**Q: How can I access STAAD.Pro Building Design Manual NWatch?** A: NWatch is available as an add-on module for STAAD.Pro. You can purchase and install it directly from Bentley Systems' website or through authorized distributors.

**Q: What are the benefits of using NWatch?** A: NWatch automates the code-checking process, ensuring compliance with industry standards. It also reduces design time and improves accuracy by eliminating manual calculations and potential errors. Additionally, it provides detailed reports documenting the design checks performed.

**Q: How does NWatch work?** A: Once installed, NWatch integrates with STAAD.Pro and analyzes the structural model. It checks structural elements against the applicable code provisions, including member capacity, serviceability, and stability. NWatch generates detailed reports that summarize the design checks and identify any violations or non-compliances.

**Q: What are the different code sets supported by NWatch?** A: Currently, NWatch supports the following code sets:

- ACI 318-19 for concrete design
- AISC 360-16 for steel design
- AISC 341-16 for cold-formed steel design
- NDS 2018 for wood design
- IBC 2018 for general building code requirements
