DVSA no longer publishes the list of exact questions which will appear during the test.

**What is the hardest part of a theory test?** Although often deemed the hardest part of the theory test, the hazard perception section gauges a candidate's situational awareness and makes an essential contribution to road safety competency.

**How do you memorize a theory test?** Try to revise in bite-sized chunks throughout the day—e.g., ten minutes every hour or so. The more you revise, the easier it will become. If in doubt, start with the Highway Code, which provides vital road information and rules. We advise buying resources like the official DVSA handbook or the AA theory test book.

**Is the theory test hard?** Many people find the theory test daunting and something that they do not look forward to. This is the total amount of hours you'll need to be ready for the questions and the hazard perception test. Once you start learning to drive, it is important to start revising for your theory test.

**How to learn theory questions?** Don't look at a question, assess the theory you'll need for the question... study the theory, then do the question. This is equally dangerous, because you're training your brain to solve problems by going back to theory before you answer your question.

**How do you answer a theory question?**
