### **The Missing Link: Marked 1 JM Sevilla**

#### **1. What is the significance of the artifact marked "1 JM Sevilla"?**

The artifact marked "1 JM Sevilla" is a gold plaque discovered in 1513 during the Spanish conquest of Panama. It has been hailed as a potential "missing link" between pre-Columbian cultures and the arrival of Europeans in the Americas.

#### **2. What does the inscription on the plaque reveal?**

The inscription on the plaque reads "1 JM Sevilla," which has been interpreted as follows:

- "1" may refer to the first expedition led by Spanish explorer Vasco Núñez de Balboa.
- "JM" may stand for "Juan de Morales," a Spanish goldsmith who accompanied Balboa.
- "Sevilla" indicates the plaque's origin in the Spanish city of Seville.

#### **3. How did the plaque end up in Panama?**

It is believed that the plaque was brought to Panama by Spanish explorers in the early 16th century. It may have been intended as a gift for a local chief or as a symbol of Spanish sovereignty.

#### **4. What does the plaque tell us about pre-Columbian contact with Europeans?**

The presence of the plaque in Panama suggests that pre-Columbian populations may have had some contact with Europeans before the arrival of Columbus in 1492. However, the nature and extent of this contact remains a subject of debate among historians.

### **5. Is the plaque a piece of evidence for pre-Columbian transoceanic travel?**

While the plaque does not provide definitive proof of pre-Columbian transoceanic travel, it has fueled speculation that such voyages may have occurred. Some researchers believe that the plaque may have been created in Spain and transported to Panama by Spanish explorers, while others suggest that it was crafted by pre-Columbian people who had contact with Europeans.

**Travis Stoves Guide: Your Questions Answered**

Travis Industries has been a leading manufacturer of wood and gas stoves for over 40 years. Their stoves are renowned for their high quality, efficiency, and style. If you're considering a Travis stove for your home, here are some common questions and answers to help guide your decision:

**1. What are the different types of Travis stoves available?**

Travis offers a wide range of stoves, including wood stoves, gas stoves, and pellet stoves. Wood stoves are the most traditional type, burning seasoned hardwood logs to provide heat. Gas stoves are convenient and easy to use, operating on natural gas or propane. Pellet stoves burn compressed sawdust pellets, offering an automated and cost-effective heating option.

**2. How do I choose the right size stove for my home?**

The size of stove you need depends on the square footage of your home and the level of heat you desire. A qualified contractor can perform a heat loss calculation to determine the appropriate stove size for your specific needs.

**3. What are the installation requirements for Travis stoves?**

---

THE MISSING LINK MARKED 1 JM SEVILLA

Travis stoves require a properly installed chimney or venting system. The specific requirements will vary depending on the type of stove and the fuel source. It's essential to follow the manufacturer's instructions carefully and have the stove installed by a qualified professional.

#### **4. How efficient are Travis stoves?**

Travis stoves are highly efficient, with many models exceeding 75% efficiency. This means that a large portion of the heat generated by the stove is used to warm your home, rather than escaping up the chimney.

#### **5. What is the warranty on Travis stoves?**

Travis stoves come with a limited lifetime warranty on the firebox and a 5-year warranty on the remaining components. This comprehensive warranty provides peace of mind and ensures that your Travis stove will provide years of reliable heating.
