What does AUC code for? AUC stands for "Area under the ROC Curve." That is, AUC measures the entire two-dimensional area underneath the entire ROC curve (think integral calculus) from (0,0) to (1,1).

What does AUC mean in diagnostics? The area under the curve (AUC) The AUC is widely used to measure the accuracy of diagnostic tests. The closer the ROC curve is to the upper left corner of the graph, the higher the accuracy of the test because in the upper left corner, the sensitivity = 1 and the false positive rate = 0 (specificity = 1).

What is BMW rain sensor? The rain sensor is located at the upper edge of the windscreen, detects drops of water on the windscreen using infrared technology and adjusts the wiper frequency of the windscreen wipers continuously to the conditions.

What is the function of the AUC sensor? The AUC function is to detect pollutants in the ambient air when A/C is using outside air (as opposed to recirculating inside air). If it detects pollutants, it causes the recirculation flap to go to recirculate mode, but it does NOT shut down compressor function.

What is AUC automatic air recirculation? The automatic air recirculation control "AUC" in your BMW detects pollutants in the environment and automatically switches on the air recirculation function if the pollutant level is too high.
