What is a feed analysis in animal science? Feed analysis allows you to know what your feed is deficient in or adequate in to allow you to meet the nutrient requirements which allows the animal to perform (grow, lactate, run, etc.). What are the methods used to determine the quality of feed and feed ingredients? For this reason, feed evaluation has always been in the forefront of nutritional research. Feed evaluation for poultry involves several approaches that include chemical analysis, table values, prediction equations, near-infrared reflectance spectroscopy, in vivo data and in vitro digestion techniques.

What is a guaranteed feed analysis? Broadly speaking, the Guaranteed Analysis (GA) is the nutrient profile found on the back of the bag or can. GAs divulge the diet's basic nutrient composition (ie; the make-up of crude fat, crude protein, and moisture). To put it simply, GAs are just that – guaranteed. You know exactly what you are getting!
