Turkle: Life on the Screen, Chapter 10: Identity Crisis

Question: Turkle argues that the internet has created a new kind of identity crisis. What is this crisis, and how is it different from previous identity crises?

Answer: Turkle argues that the internet has created a new kind of identity crisis because it allows people to create multiple online personas that are often very different from their offline selves. This can lead to a sense of fragmentation and confusion about who one really is. In the past, people's identities were largely defined by their physical presence and their interactions with others in the real world. However, the internet allows people to create online identities that are not tied to their physical selves. This can lead to a sense of freedom and anonymity, but it can also lead to a sense of disconnection and alienation.

Question: How does Turkle believe that the internet affects our sense of self?

Answer: Turkle believes that the internet can have a profound impact on our sense of self. She argues that the internet can lead to a sense of fragmentation and confusion about who one really is. This is because the internet allows people to create multiple online personas that are often very different from their offline selves. This can lead to a sense of disconnection and alienation from one's true self.

Question: What are some of the ways that people use the internet to create new identities?

Answer: People use the internet to create new identities in a variety of ways. Some people create online avatars that are very different from their offline selves. Others use social media to present a curated version of themselves that is not entirely accurate. Still others use the internet to explore different aspects of their personality that they would not be able to express in the real world.

Question: What are some of the potential risks of creating new identities online?

Answer: There are a number of potential risks associated with creating new identities online. One risk is that people may become so invested in their online identities that they neglect their offline relationships. Another risk is that people may be exposed to online harassment or abuse. Additionally, people may find it difficult to maintain multiple identities without becoming confused or overwhelmed.

Question: What does Turkle suggest that we can do to mitigate the risks of identity crisis in the digital age?

Answer: Turkle suggests that we can mitigate the risks of identity crisis in the digital age by being mindful of the ways that the internet can affect our sense of self. She also suggests that we should be careful not to become too invested in our online identities and that we should maintain strong offline relationships. Additionally, she suggests that we should be aware of the potential risks of online harassment and abuse.
