Who is standing there when the narrator wakes up the morning after the plane crash? The narrator becomes an aircraft pilot, and one day, his plane crashes in the Sahara desert, far from civilization. The narrator must fix his aeroplane before his supply of water runs out. Here, he is greeted by a young boy nicknamed "the little prince."

What did the little prince learn about himself in chapter 20? The little prince is devastated to discover that his rose was lying to him when she said that she was unique in the entire universe. He reflects that he is only prince over three little volcanoes and a common rose and realizes that he is not very great prince at all. He lays in the grass and cries.

What does the little prince prefer to ask instead of answering questions? The pilot tries to find out where his mysterious new friend comes from, but the little prince prefers asking questions to answering them. He questions the pilot about his plane and what it does, and the pilot tells the little prince that it allows him to fly through the air.

What is unique about the fifth planet, the lamplighter's planet? The fifth planet is the smallest of these planets, with only enough room for a street lamp and a lamplighter.

How did the narrator feel when he saw another plane in the sky? He was feeling afraid and helpless when he suddenly saw another aeroplane outside. The pilot of that aeroplane asked the narrator to follow him and began to guide him through the clouds.

Why do you think the narrator always kept drawing number one with him? And even as an adult, he still gauges new people by showing them the picture he'd drawn as a kid of a boa swallowing an elephant. He writes: Whenever I met one of [the grown-ups] who seemed to me at all clear-sighted, I tried the experiment of showing him my Drawing Number One, which I have always kept.

What does the snake symbolize in the little prince chapter 17? Like the baobabs, the snake the little prince meets in Chapter 17 represents a force that is harmful. He evokes the snake of the Bible, who causes Adam and Eve's expulsion from Eden by convincing them to eat the forbidden fruit.

What is the secret of the fox in the little prince? The prince then returns to say good-bye to the fox. The fox tells him a threefold secret: that only the heart can see clearly because the eyes miss what is important; that the time the prince has spent on his rose is what makes his rose so important; and that a person is forever responsible for what he has tamed.

What does the fox represent in Little Prince? The Fox represents the wisdom of experience and the importance of forming meaningful connections with others. He teaches the Little Prince about the essence of relationships and how to truly understand and appreciate others.

What do the baobabs symbolize in the little prince? Therefore, some see the baobabs as symbols of the everyday hurdles and obstacles in life that, if left unchecked, can choke and crush a person. This interpretation explains the narrator's statement that people wrestle with baobabs every day, often without even knowing it.

What is the greatest lesson you can get from this story the little prince? #1 Listen to your heart. Surely, if you've read the Little Prince, you know the famous quote from it: "It is only with the heart that one can see rightly; what is essential is invisible to the eye".

What is the irony in the little prince? The Little Prince keeps on repeating that "the grown-ups are very strange." He clearly doesn't understand what's going on with people's behaviors. The irony is that he left his planet to explore the world and to meet people because he felt lonely. But that inner solitude is always present even

when meeting new people.

What does the lamplighter symbolize in the little prince? In this sense, the lamplighter's character represents the working class, or any members of a community who perform physical labor or service jobs. Their work may be unglamorous, but it is foundational to maintaining a fully functioning society.

Why did the little prince leave the sixth planet? The rose's lie makes the prince doubt the sincerity of her love. He grows so unhappy and lonely that he decides to leave his planet.

What does the drunkard represent in the little prince? The Drunkard symbolizes the man who is forever trapped by his past mistakes. Rather than face his past, consequences, or the challenges of change, the Drunkard chooses to stay caught in the cycle of shame and despair.

Why could the woman in the control room not help the pilot of Dakota? THE ANSWER IS:- When the pilot of the Dakota plane asked the woman in the control centre about the black aeroplane and its pilot, she could not help him because she had not seen any other plane flying that night on the radar.

Why does the narrator say landed and was not sorry to walk away from the Old Dakota? After landing, the narrator did not feel sorry to walk away from the old Dakota because he had a very horrific and scary experience flying that plane. He was happy that he had landed the plane safely with the help of the strange black aeroplane. That is why he was not sorry to walk away from it.

Why and when did the narrator say that everything was going well, it wasn't easy flight? The narrator said that everything was going well and it was an easy flight when he was flying his old Dakota aeroplane from Paris to London. He had been flying for about an hour and everything was going smoothly. The weather was good, the plane was in good condition, and he was feeling relaxed.

Why did the little prince laugh at the pilot? The pilot replies that it isn't an object—it flies and it's his airplane. The little prince asks whether he fell from the sky then, and when the pilot responds that he did, the little prince laughs and asks which planet he came from.

What profession did the narrator choose instead? The narrator chooses another profession instead, becoming a pilot.

Why couldn't the fox play with the little prince? A fox appears, and the little prince asks the fox to play with him because he is so unhappy. The fox replies that he cannot play because he is not tamed.

What does water symbolize in the little prince? Water represents spiritual nourishment and the joy that we can take in everyday moments. Water begins as a seemingly ordinary resource that we take for granted in our lives, but in the desert, it becomes a rarity.

Why did the snake bite the little prince? The snake bites him because the Prince believes it will help him to get back to his planet. If this element of the world according to the Little Prince is false, then what makes any of it meaningful? If he does not get back to his planet, as he believed he would, then there was no elephant in the snake.

What does the desert symbolize in the little prince? In this capacity, the desert symbolizes the narrator's mind. Made barren by grown-up ideas, the narrator's mind slowly expands under the guidance of the little prince in the same way that the deadly desert slowly transforms itself into a place of learning and, once the well appears, refreshment.

She asked him if he saw any animals. She also told him that she felt sad because there were hardly any animals left in the forests of Dehra.

What does the author now call the damaged area of the jungle where the plane crash landed? The scar in Lord of the Flies describes the physical area of the island, which is the crash site of the plane that the boys were on. The reader will imagine it as large skid marks or indentations created when the plane hit the jungle and ground.

Why did she find every step in the jungle difficult? 10 did she find every step in the jungle difficult? Overgrown, tangled vines on the bank of the stream and huge, rotted trunks that barred the way made every step in the jungle difficult for Julianne.
