

COMPLETE TO HOMEOPATHY

[Download Complete File](#)

What is a complete symptom in homeopathy? Each complete symptom has its i, location; 2, sensation; 3, modalities, conditions of aggra vation and amelioration; and 4, concomitants. In any given disease one complete symptom is worth a dozen incomplete or fractional symptoms in the selection of the homoeopathic curative remedy.

What are examples of homeopathy? Homeopathic products come from plants (such as red onion, arnica [mountain herb], poison ivy, belladonna [deadly nightshade], and stinging nettle), minerals (such as white arsenic), or animals (such as crushed whole bees).

What is homeopathy? Homeopathy is an alternative medicine based on the theory of treating 'like with like'. Homeopathy claims to stimulate healing responses to diseases by administering substances that mimic the symptoms of those diseases in healthy people.

What are the two types of homeopathy? In classical homeopathy, the practitioner attempts to match a single preparation to the totality of symptoms (the similium), while "clinical homeopathy" involves combinations of preparations based on the illness's symptoms.

Does homeopathy really work? There's no good-quality evidence that homeopathy is an effective treatment for these or any other health conditions. Some practitioners also claim homeopathy can prevent malaria or other diseases. There's no evidence to support this, and no scientifically plausible way that homeopathy can prevent diseases.

Do homeopathy symptoms get worse before better? However, some people report feeling worse briefly after starting a homeopathic remedy. Homeopaths interpret this as the body temporarily stimulating symptoms while it makes an effort to restore health. In people who have serious illnesses, these temporary aggravations of symptoms can be very harmful.

What is the success rate of homeopathy? While conventional doctors had a death rate of 50 per cent, homeopaths cured 80 per cent of their patients.

What is the main ingredient in homeopathy? Products labeled as homeopathic can contain a wide range of substances, including ingredients derived from plants, healthy or diseased animal or human sources, minerals, and chemicals. Products labeled as homeopathic generally include: The word “Homeopathic” The ingredients listed in terms of dilution, e.g. 1X, 6X, 2C.

What is the best homeopathic remedy?

Which disease is best for homeopathy?

Is homeopathy harmful or helpful? Homeopathic remedies are considered to be well tolerated, although allergic reactions (like rashes) have been reported. Some people also find their symptoms become worse at the start of treatment. Interactions with other drugs haven't been well studied, although they're unlikely given the high dilution of the remedies.

Are homeopaths real doctors? Homeopathic medicine comes in various forms, including pills and tinctures. While some homeopathic practitioners may describe themselves as “homeopathic doctors,” there are no accredited schools that offer a doctorate in homeopathy in the United States or Canada.

Is homeopathy the same as holistic? Homeopathy is a type of holistic medicine, but has a distinctly unique approach compared to other types of holistic medicine, like naturopathic medicine or traditional Chinese medicine (eg. Acupuncture).

What are homeopathic doctors called? Homeopathic doctors (who also are called “homeopaths”) weaken these ingredients by adding water or alcohol. Then they shake the mixture as part of a process called “potentization.” They believe this step

transfers the healing essence. Homeopaths also believe that the lower the dose, the more powerful the medicine.

What type of mental disease is homeopathy? We use Homeopathy as a tool to treat ,mental-emotional imbalances. The advantage of homeopathy is that it is free of side effects. We can treat all ailments like anxiety depression, fear, phobias, schizophrenia, obsession etc., in a healthier way.

What are primary symptoms and secondary symptoms in homeopathy? PRIMARY SYMPTOMS, that express the perturbation of the vital force due to the disease; SECONDARY, or reactive, SYMPTOMS due to the reaction of the vital force that opposes to the perturbation and tries to heal the disease.

What is an example of a concomitant symptom in homeopathy? Concomitant means an accompanying complaint or the symptom. For example, a patient with fever may feel weak on the first or second day. Here weakness is a concomitant. Another patient may be thirstless during fever even in summer days.

What is the concept of symptomatology? 1. : the symptom complex of a disease.
2. : a branch of medical science concerned with symptoms of diseases.

What are basic and determinative symptoms? Basic symptoms are important only when they are signified by personal modification. Determinative symptom whether encountered in disease or a drug proving are alike and usually consists of: Modalities Mental symptoms ,Qualified basic or absolute symptoms. Strange, rare or peculiar symptoms as mentioned by Hahnemann.
