## [Download Complete File](#)

**What are the character traits of George?** He is short-tempered but a loving and devoted friend, whose frequent protests against life with Lennie never weaken his commitment to protecting his friend.

**What is the direct characterization of George Milton?** The character of George is directly characterized as "small and quick," having "small, strong hands, slender arms, a thick, and bony nose." Lennie is described in the first chapter as a "huge man" that "walked heavily, dragging his feet a little, the way a bear drags his paws." The initial direct characterization ...

**What are George Milton's flaws?** George Milton becomes a tragic hero in the story. A tragic hero is a literary character who makes a judgment error that inevitably leads to his own destruction (Tragic). George is flawed because of his need for Lennie, which is his only family. Since George keeps covering for Lennie his actions lead to his downfall.

**What is George Milton's main conflict?** Throughout the story, *Of Mice and Men*, George struggles with supervising Lennie, George's mentally handicapped traveling companion, along with keeping them both employed and out of trouble.

**How would George be described?** George is described as 'small and quick'. This is in contrast to Lennie who is 'big and slow'. George is clever but quick to anger. Lennie is not clever and is slow to lose his temper.

**Why is George the most important character?** George is the most important character. He carries the dream of the farm and must constantly watch over Lennie

and protect him.

**Why did George shoot Lennie?** Answer and Explanation: The reason George shoots Lennie at the end of *Of Mice and Men* is because Lennie killed Curley's wife. If George did not shoot Lennie, the large man would either be shot in the stomach by Curley, a slow and painful death, or locked up in an institution.

**How is George described in chapter 1?** The first, George, is small, wiry, and sharp-featured, while his companion, Lennie, is large and awkward. They are both dressed in denim, farmhand attire. As they reach a clearing, Lennie stops to drink from the river, and George warns him not to drink too much or he will get sick, as he did the night before.

**What is George's goal in *Of Mice and Men*?** George is determined to make their next position their last—he wants to save up enough money to buy a spit of land all his own, farm it, and live there with Lennie free of the responsibilities and indignities of working for a different ranch boss each month.

**What is George Milton's key personality?** George Milton is portrayed as a sharp, quick-tempered man in *Of Mice and Men*, but evolves into a selfless, caring one. George and Lennie's relationship, described like a master and his dog, is what drives most of the action.

**What does George symbolize?** Some critics believe George represents that doomed man who longs to return to Eden. His one chance to avoid that fate is his relationship with Lennie, which makes them different from the other lonely men. But despite this companionship, at the end of the book, George is fated to be once again alone.

**What is George's moral dilemma?** George's killing of Lennie is a moral dilemma as it exists in the gray area of permissible euthanasia. George was ultimately correct and justified in the ...show more content... If Lennie was not abruptly killed by George he would have suffered physical harm from Curley, the Police, and other farm hands.

**Is George Milton a good friend?** George is a protective man, who has been caring for his friend Lennie for a long time. The two men are not related but have been

friends since they were children, so as well as enjoying his company, George also feels responsible for his welfare. George often talks to Lennie about their dream.

**Is George a protagonist or antagonist?** The protagonists of the novella are George and Lennie. Their friendship sets them apart from the other characters, all of whom are lonely and isolated to varying degrees. George and Lennie's friendship is seen most vividly in their shared dream of owning a farm together.

**What is George upset about?** George gets upset a few times in Chapter 2. He is upset when he thinks Candy is eavesdropping on him and Lennie. He also gets upset after meeting Curley and Curley's wife. He knows that Curley is trouble, and he is worried that Curley and his wife will start trouble with Lennie.

**What are some character traits of George?** George is Lennie's one and only best friend. He is "small and quickwitted, dark of face, with restless eyes and sharp, strong features." Every part of him is defined: small, strong hands, slender arms, a thin and bony nose. A man who keeps to himself, he is slow to trust others but quick to read them.

**How is George described physically?** George was small and quick, dark of face, with restless eyes and sharp, strong features. He had small, strong hands, slender arms, a thin and bony nose.

**What is the significance of George Milton's name?** George's last name is significant because he is named after the author of one of Steinbeck's favorite works, "Paradise Lost." It is said that George's character is patterned off of Milton's main character who wishes for nothing more than to return to Eden.

**How would you describe the character George?** George is a small, quick-witted man; his intelligence contrasts with Lennie's throughout the book; as does his size. George often has to think quickly in order to cover up for Lennie's mistakes.

**Why is George a lonely character?** Answer and Explanation: George is lonely in *Of Mice and Men* because of his own discipline and his relationship with Lennie. He avoids fraternizing with the men on the ranch because he feels like he needs to focus on the task at hand: buying a farm. Anything else is a distraction.

**Why is George a complex character?** George is the most complex character in *Of Mice and Men* due to the conflicts of Lennie getting into a fight with Curley, George having to deal with Lennie killing Curley's wife, and George always having to look out for Lennie even though he would be better off alone.

**Was Lennie autistic?** The character of Lennie has learning difficulties and also—as identified by some researchers—exhibits many characteristics of autism.

**What did George say to Lennie before he killed him?** Before George shoots Lennie, he tells him to look out over the river and picture the farm they're going to have. George goes on to describe the farm and tells him that he will tend to the rabbits and that everybody will be nice to him and assures him that he's not mad at him for what he did.

**Who is the only one who really understands what George did?** 2. Who is the only one who really understands what George did? When the men arrived, Slim was the only one who could sympathize with George. Because of their earlier conversation, he understood the relationship between George and Lennie.

**What are George's strengths?** George has many strengths, however probably his greatest strength is his brain. He always knows what to say and what not to say, however Lennie doesn't so George always finds himself having to help Lennie out of a situation.

**How does George change throughout the novel?** In the novel *Of Mice and Men* by John Steinbeck, the character George undergoes a major physiological changes due to the hard work from the physical environment, the geographical seclusion, and the cultural environment created by the men he works with; these factors cause him to realise that he needs to get rid of his ...

**Why did Aunt Clara stop giving Lennie mice?** Aunt Clara used to give Lennie mice to pet. Lennie loved the mice because they were soft. However, Aunt Clara had to stop giving them to him because he would accidentally kill them from petting them too hard.

**What are the character traits of George in *The Great Gatsby*?** Wilson is described as "blond, spiritless and anaemic". Whereas Tom comes across as strong,

forceful and energetic, Wilson seems weak and demotivated. However, the men do have some things in common. They share a love for Myrtle, and each fears losing his wife.

**What are the character traits of George Wilson?** He is a good man who is hardworking and faithful to his wife, but he is described as being worn-out and colorless. He is his wife's man, not his own, as he answers to her every beck and call which Myrtle believes makes him weak and cowardly.

**What are the character traits of George Washington?** His driving ambition, love of detail, patience, determination, sense of responsibility and other conspicuous traits that made him the person that he was are related to the temperament with which he was born.

**What are some character traits of George in the Veldt?** George is a good and decent man on the surface; he loves his wife and children. But George is also weak, lazy, and slow to understand, and these traits lead to tragedy. George lets his laziness guide him when he purchases the HappyLife Home.

**Does George know Myrtle is cheating?** In the opening chapters of the book, Wilson is unaware that Myrtle is cheating on him with Tom. It is not until he finds the dog collar in Chapter 7 that he realises that she has been having an affair, but is unsure of with whom. He physically locks Myrtle away, seemingly unable to bear the thought of losing her.

**What does George look like Great Gatsby?** In contrast to the physically impressive Tom, the beautiful Daisy, and the charming, colorful Gatsby, George is described as a “blond, spiritless man, anaemic and faintly handsome.” A once-promising young man, George has since been beaten into submission by poverty.

**Who does George love in The Great Gatsby?** George loves and idealizes Myrtle, and is devastated by her affair with Tom. George is consumed with grief when Myrtle is killed. George is comparable to Gatsby in that both are dreamers and both are ruined by their unrequited love for women who love Tom.

**What are George's traits?** While Lennie Small, George's companion, is simple-minded and friendly, George is sharp in every way: his physical features are slim and

sharp; he has a sharp mind and wit; he is quick-tempered and sharp when dealing with Lennie.

**Who are the poor characters in *The Great Gatsby*?** The lower class characters – Gatsby, Myrtle, and George – are thus essentially sacrificed for the moral failings of the upper class characters of Tom and Daisy.

**Why did Myrtle marry George?** “I married [George] because I thought he was a gentleman,” she said finally. “I thought he knew something about breeding, but he wasn't fit to lick my shoe.”

**What was John Adams' personality like?** JOHN ADAMS (1735-1826). The most outspoken advocate for independence in the Second Continental Congress, he was “obnoxious, suspected and unpopular” by his own admission and was viewed by his colleagues as impetuous, vain, and highly opinionated. Nevertheless, he commanded respect for his integrity and intellect.

**What was King George's character traits?** A Faithful Tyrant But the private George was gentle and decent, although exceedingly strict. He strived to restore a high moral tone to the royal family. He was the first Hanover king not to take a mistress, and the English people admired his fidelity to his wife, Queen Charlotte.

**What is George Washington best described as?** George Washington is often called the “Father of His Country.” He not only served as the first president of the United States, but he also commanded the Continental Army during the American Revolution (1775–83) and presided over the convention that drafted the U.S. Constitution.

**How would you describe the character George?** George is a small, quick-witted man; his intelligence contrasts with Lennie's throughout the book; as does his size. George often has to think quickly in order to cover up for Lennie's mistakes.

**What is the character sketch of George?** George is another friend in the story "Three Men in a Boat." He is a hardworking person and is known for his practical nature. Some of the characteristics of George are: - Practical: George is a practical person and likes to get things done. He is not afraid of hard work and is always willing to lend a hand.

**What's George's problem in The Veldt?** The disinterested George has allowed his son to become so spoiled that the boy doesn't want to learn to do anything by himself. Even more alarming is the ease with which George gives in and lets Peter go play in the nursery. He is so lazy that he cannot even muster the energy required to discipline his young son.

**What do electrical engineers do in the power industry?** Electrical engineers design, develop, test, and supervise the manufacture of electrical equipment, such as electric motors, radar and navigation systems, communications systems, or power generation equipment.

**What are the basics of power plant?** Power plants that burn fuels generally use steam boilers, combustion turbines, or both. Steam boilers burn fuel to heat water and produce steam. This steam is then channeled through a turbine, where it turns the blades and generates electricity.

**What three types of fuels are used in power plants?** The three major categories of energy for electricity generation are fossil fuels (coal, natural gas, and petroleum), nuclear energy, and renewable energy. Most electricity is generated with steam turbines that use fossil fuels, nuclear, biomass, geothermal, or solar thermal energy.

**What are the turbines in a power plant?** Turbines are used in wind power, hydropower, in heat engines, and for propulsion. Turbines are extremely important because of the fact that nearly all electricity is produced by turning mechanical energy from a turbine into electrical energy via a generator.

**Why should we hire you?** A: When answering, focus on your relevant skills, experience, and achievements that make you the best fit for the role. You should hire me because I am a hard worker who wants to help your company succeed. I have the skills and experience needed for the job, and I am eager to learn and grow with your team .

**Which branch of electrical engineering is the hardest?** What is the most difficult electrical engineering sub-discipline/concentration ? Although this is a biased answer, but I think computer engineering is the hardest concentration/sub-discipline. I say this because you have to know hardware and software really well. I would say learning software is more challenging.

**What skills do you need to work at a power plant?**

---

**What are the basics of power plant?** Power plants that burn fuels generally use steam boilers, combustion turbines, or both. Steam boilers burn fuel to heat water and produce steam. This steam is then channeled through a turbine, where it turns the blades and generates electricity.

**What is the basic work of power plant?** Basic Principle The burning of fuels such as oil, coal and LNG (liquefied natural gas) fires a boiler to generate high-temperature, high-pressure steam. This steam is used to drive a steam turbine. A generator attached to the steam turbine generates electricity.

**What questions are mostly asked in an interview?**

**What is the highest salary for a power plant operator?**

**What do engineers do at power plants?** A power plant engineer maintains day-to-day operations in a power plant. Their main duties involve conducting operational tests, providing preventative maintenance on machines, inspecting thermal systems, and working closely with other plant personnel. This job requires a bachelor's degree in engineering.

**How hard is it to get a job at a power plant?** Power plant operators, distributors, and dispatchers typically need at least a high school diploma or equivalent. However, employers may prefer workers who have a college or vocational school degree. Power plant operators and dispatchers undergo rigorous, long-term on-the-job training and technical instruction.

**What are the 6 types of electrical power plants?**

**What is the voltage of a power plant?** Electricity is generated at 11000 V or 11 kV at the generating stations. It is cheaper to generate electricity at a relative lower voltage and then step it up for transmission. Hence, most power generating plants are designed to operate at 11kV across the world.

---

**What are the three main sections of a power plant?** The electrical power system consists of three major components: generation, a high voltage transmission grid, and a distribution system. The high voltage transmission system links the generators to substations, which supply power to the user through the distribution system.
