What is MIFARE and DESFire? MIFARE DESFire is a highly secure solution with DES, 2K3DES, 3K3DES and AES hardware cryptography. It can be integrated into mobile schemes and support multi-application smart card solutions.

What is MIFARE reader? Mifare Card Reader Mifare cards are contactless integrated circuit (IC) cards which are now widely used in a lot of countries including Malaysia. Mifare cards are used as public transport cards, season parking passes, gated housing access cards, employee access cards and so much more.

Is MIFARE DESFire secure? Based on open global standards for both RF interface and cryptographic methods, our MIFARE DESFire product family provides highly secure microcontroller-based ICs.

What is the authentication process of MIFARE DESFire? MIFARE DESFire Authentication Process: The card responds with a random number (challenge) encrypted using the specified key. The reader decrypts the challenge using the same key and sends the result back to the card. The card verifies the response and, if successful, sends an authentication status back to the reader.

Is MIFARE an NFC or RFID? NFC and Mifare are both contactless technologies that use radio frequency identification (RFID) to enable secure communication between devices at close range. However, they differ in several ways, including their frequency range, data transfer rates, and security features.

Is MIFARE a smart card? MIFARE is a series of integrated circuit (IC) chips used in contactless smart cards and proximity cards.
