Exploring the Ford Explorer Sport Trac: Pros and Cons\*\*

The Ford Explorer Sport Trac, a versatile vehicle combining the practicality of a truck with the comfort of an SUV, has been an intriguing option for drivers since its introduction in 2001. However, as with any vehicle, the Sport Trac comes with its own set of strengths and limitations.

### **Reliability and Mileage**

The reliability of the 2001 Ford Explorer Sport Trac varies depending on the maintenance it has received. With proper care, it can last up to 200,000 miles or more. However, some models have faced issues with transmission problems.

### **Common Issues**

Some common problems reported by owners of the 2001 Ford Explorer Sport Trac include:

- Transmission issues
- Electrical problems
- Air conditioning issues
- Brake problems
- Engine overheating

### **Failed to Start Issues**

If your 2001 Ford Explorer Sport Trac fails to start, several possible causes need to be considered:

- Dead battery
- Bad starter
- Malfunctioning ignition switch
- Faulty anti-theft system

### **Resetting the Anti-Theft System**

To reset the anti-theft system on a 2001 Ford Explorer Sport Trac, follow these steps:

1. Insert the correct key into the ignition.
2. Turn the key to the "On" position, but do not start the engine.
3. Wait 10 minutes.
4. Turn the key to the "Off" position and remove it.
5. Wait 1 minute.
6. Repeat steps 2-5 two more times.

### **Truck vs. SUV**

While the Ford Explorer Sport Trac resembles a truck, it is technically classified as an SUV due to its unibody construction and independent rear suspension.

### **Discontinuation and Engine Options**

The Ford Sport Trac was discontinued in 2010 due to declining sales. The 2001 model year featured a 4.0L V6 engine as standard, while a 4.6L V8 was available as an option.

### **Limp Mode**

Limp mode in a Ford Explorer occurs when the vehicle's computer detects a problem and reduces engine power to protect it from damage.

### **Other Key Considerations**

- The starter relay on a 2001 Ford Explorer Sport Trac is located under the hood, next to the battery.
- The best years for the Sport Trac are considered to be 2006-2009.
- The Ford Explorer Sport Trac comes with a 15.5-gallon fuel tank.
- The life expectancy of the Ford Explorer Sport Trac is estimated to be around 10-15 years with proper maintenance.
- While some 2001 Ford Explorer Sport Tracs can reach 300,000 miles and beyond, it requires exceptional care.
- The Ford Explorer Sport is generally regarded as more reliable than the Sport Trac due to its simpler design.
