**What is the economic system in the United States your answer?** The United States has a mixed economy. Its economic system functions with characteristics of both capitalism and socialism. A mixed economic system protects some private

---

property and allows a level of economic freedom in the use of capital.

**What are the three economic questions all systems must answer?**

**Which of these is not a question economic systems must answer?** The four fundamental questions in economics are: what to produce, how to produce, for whom the output is produced, and how much to produce. When to produce is not one of the fundamental questions per se.

**What type of economy is the USA?** The US economy is a mixed economy incorporating both capitalism and socialism. There is freedom of choice and consumer sovereignty in the US economy. The US does not have a free market economy because there is some regulation and control of specific industries by the government.

**What are the 4 types of economic systems?** The 4 main types of economic systems are traditional economies, command economies, market economies, and mixed economies. Traditional economies are based on conventional forms of providing sustenance. In command economies, rulers hold the power over production and distribution.

**What is the main purpose of an economic system?** The purpose of an economic system, at its core, is to preserve people's way of life by figuring out the best ways to distribute goods and services based on skills and available resources.

**What are the 3 main economic systems with brief explanation?** Market economy ("hands off" systems, such as laissez-faire capitalism) Mixed economy (a hybrid that blends some aspects of both market and planned economies) Planned economy ("hands on" systems, such as state socialism, also known as "command economy" when referring to the Soviet model)

**What are the three basic economic problems with examples?** Answer: The three fundamental economic problems faced by every economy are: (1) what to produce, which involves determining the types and quantities of goods and services to be produced based on available resources; (2) how to produce, which focuses on selecting the most efficient methods and techniques for production ...

**What are the three basic questions an economic system answers quizlet?**

Economics: Answering the Three Economic Questions (A) What goods and services should be produced? (B) How should these goods and services be produced? (C) Who consumes these goods and services?

**What are the three basic decisions every economy must make?** The three basic decisions made by all economies are what to produce, how it is produced, and who consumes it.

**What are the three categories for classifying economic systems by how they work?** There are three main types of economic systems known as economies: a command economy, a market economy and a mixed economy.

**What is another name for the private enterprise system?** Alternative terms for a private enterprise system are a free enterprise system or a market economy. Those terms define a system where individuals own productive resources, and they are free to use them as they choose to make a profit.

**Who controls the economy?** Governments influence the economy by changing the level and types of taxes, the extent and composition of spending, and the degree and form of borrowing. Governments directly and indirectly influence the way resources are used in the economy.

**What is the best economic system?** Most political theorists and nearly all economists argue that capitalism is the most efficient and productive system of exchange.

**What are the pros and cons of a mixed economy?** Some advantages of a mixed economy are capitalism, supply and demand and the free market. Some disadvantages of a mixed economy are government regulation, and excessive taxation. A mixed economy is based on both individualistic and collective cultural philosophies.

**What is the American system of economics?** This "System" consisted of three mutually reinforcing parts: a tariff to protect and promote American industry; a national bank to foster commerce; and federal subsidies for roads, canals, and other "internal improvements" to develop profitable markets for agriculture.

**What is the economic system of the United States Quizlet?** The economic system of the United States is principally one of private ownership. This system, often referred to as a "free enterprise system," can be contrasted with a socialist economic system, which depends heavily on government planning and public ownership of the means of production.

**What answer best describes the US economic system?** The type of economic system that best describes that of the United States is a mixed economy. This means that the economic activities are directed by both the private sector and the government.

**What is the economic system in the United States brainly?** Explanation: The economic system in the United States is a market economy. In a market economy, resources are owned and controlled by individuals and businesses, rather than the government.

**Which country was the best biochemistry research?** Germany: Germany's universities are globally recognized for their research in biochemistry. Institutions like Heidelberg University and the Technical University of Munich provide top-notch education with low or no tuition fees for international students.

**How many pages is biochemistry?**

**Which country is best for PhD in biochemistry?**

**Which country is No 1 in biology?**

**Is biochemistry very hard?** It's not uncommon for biochemistry students to spend upwards of 30 hours per week on coursework alone. Complex Concepts: The material itself is daunting. Students grapple with complex topics such as metabolic pathways which aren't just tough to understand but also incredibly detailed.

**Is biochemistry harder than chemistry?** Is biochemistry harder than chemistry? Most students don't perceive biochemistry as being harder than chemistry. The reason being is that there is a lot less math in biochemistry and it's easier to conceptualize than chemistry. Chemistry involves more problem solving and calculations.

Higher-level and more experienced candidates are paid even better. The table below contains a list of average biochemist salaries in major countries around the world.

**Which country does the most scientific research?**

## **The World is Flat: A Brief History of Twenty-First Century Globalization**

**By Thomas L. Friedman**

**Q: What is the main thesis of "The World is Flat"?**

A: Thomas L. Friedman's "The World is Flat" argues that technological advancements and globalization have leveled the global playing field, creating new opportunities for individuals and businesses alike.

**Q: How does Friedman define "flatness"?**

A: Friedman describes flatness as a state where "the playing field is level for all," where access to technology, knowledge, and markets is no longer confined to only a few countries or corporations.

**Q: What are some of the key factors that have contributed to the flattening of the world?**

A: Friedman identifies several factors, including the rise of the internet, the fall of the Berlin Wall, the spread of free trade, the development of new technologies (e.g., computers, mobile phones), and the growing interconnectedness of global supply chains.

**Q: What are the implications of a flat world?**

A: Friedman believes that the flattening of the world has created both opportunities and challenges. It has opened up new markets for businesses, but it has also increased competition and put pressure on workers in developed countries. Additionally, it has facilitated the spread of ideas and information, but it has also amplified global inequalities.

**Q: What does Friedman recommend in response to the flat world?**

A: Friedman advocates for a focus on education, innovation, and entrepreneurship to capitalize on the opportunities presented by a flat world. He encourages individuals and businesses to embrace diversity, collaborate globally, and invest in new skills and technologies to remain competitive.
