6th Grade Natural Science: 5 Essential Questions and Answers

Question 1: What is the scientific method?

Answer: The scientific method is a step-by-step process that scientists use to investigate and understand the world around them. It involves making observations, asking questions, forming hypotheses, testing hypotheses, and drawing conclusions.

Question 2: What are the different states of matter?

Answer: Matter can exist in three different states: solid, liquid, and gas. In a solid, the molecules are tightly packed together and have a fixed shape. In a liquid, the molecules are less tightly packed than in a solid and can change shape to fit their container. In a gas, the molecules are very loosely packed and can move freely.

Question 3: What is an ecosystem?

Answer: An ecosystem is a community of living organisms and their physical environment. It includes all of the plants, animals, and other organisms that live in a particular area, as well as the nonliving things in the environment, such as the soil, water, and climate.

Question 4: What is adaptation?

Answer: Adaptation is any inherited characteristic that makes an organism better suited to its environment. Adaptations can help an organism survive and reproduce in a particular habitat. For example, the long neck of a giraffe helps it reach leaves

high up in trees.

Question 5: What is renewable energy?

Answer: Renewable energy is energy from natural resources that are not depleted when used. Examples of renewable energy include solar energy, wind energy, and hydroelectric power. Renewable energy sources are often considered to be more sustainable than fossil fuels, which emit greenhouse gases and contribute to climate change.
