Q1: What is a cube in SSAS 2012? A1: A cube is a multidimensional data structure that allows for fast and efficient analysis of large datasets. It contains measures (numeric values), dimensions (attributes or categories), and hierarchies (ordered levels of dimensions).

Q2: How do I create a cube using the Cube Development Cookbook? A2: The cookbook provides step-by-step instructions on creating a cube from scratch. It covers topics such as defining dimensions, measures, hierarchies, and relationships. You can follow the cookbook to create a basic cube or customize it to meet your specific requirements.

Q3: What are the different types of measures I can create? A3: SSAS 2012 supports various types of measures, including calculated measures, aggregated measures, and KPI measures.
