**Is KOHLER Command a commercial engine?** Our all-new Command PRO models are the ultimate engines for commercial walk-behind mowers.

**How many hours will a KOHLER engine last?** Using the QL tractors as a guide, and given that I've seen some old machines with original bores in them, I'm going to say around 1200- 1500 hrs. Some last longer, some don't make it that far, but in a tractor, I'd say that's close. Now, a K series in say, a gen set, should last at least twice as long.

**What is the recall on KOHLER engines?** About 24,000 Kohler gasoline engines are being recalled for faulty fuel caps which can allow over-pressurization in the fuel tank, posing a risk of a fuel leak and fire hazard. This recall involves Kohler gasoline engine models SH265, CH245, CH255, CH270, CH395, CH440, and ECH440.

horizontal-shaft, gasoline, full-pressure lubrication with oil filter, aluminium head and crankcase with cast iron cylinder liners, two-barrel carburettor.

**Does KOHLER make their own engines?** Kohler is a global leader in the manufacture of kitchen and bath products, engines and power generation systems, cabinetry, tile and home interiors, and is international host to award-winning hospitality and world-class golf destinations.

**How often should you change oil on a Kohler engine?** The engine crankcase oil and the filter must be changed after every 300 hours of operation.

**Why does my Kohler engine keep dying?** The carburetor might be clogged. A clogged carburetor is most commonly caused by leaving fuel in the engine for a long period of time. Over time, some of the ingredients in the fuel may evaporate, leaving behind a thicker, stickier substance. This sticky fuel can clog up the carburetor and cause the engine to stall.

**Is 500 hours a lot on a mower?** How Many Hours Should A Riding Mower Last? Most riding mowers last between 500-700 hours, although some can run for as much as 1,000 hours if cared for and maintained properly.
