CROSSWORD PUZZLE

[Download Complete File](#)

How did the Civil War begin Quizlet? The Civil War began on April 12, 1861. The first shots of the Civil War were fired at Fort Sumter, South Carolina. A federal outpost in Charleston, South Carolina, that was attacked by Confederate troops, began the Civil War.

What were the motives that led individual soldiers to fight in the Civil War? The soldiers who fought in the Civil War had many different reasons for fighting: some believed it was their duty to their country; others saw it as an opportunity for adventure or to build a new life for themselves; still others were forced to go due to the institution of a military draft, or conscription, in the ...

What started the Civil War in America? At 4:30 a.m. on April 12, 1861, Confederate troops fired on Fort Sumter in South Carolina's Charleston Harbor. Less than 34 hours later, Union forces surrendered. Traditionally, this event has been used to mark the beginning of the Civil War.

Could the Civil War have been avoided? Conclusion: The American Civil War was inevitable. To avoid war the South needed to abolish slavery and find a supplemental, free workforce to support its agrarian economy or the North, under President Lincoln had to let the first secession states leave the Union unchecked.

How did civil war battles start? April 12, 1861- Confederate forces fire upon Fort Sumter, South Carolina. The Civil War formally begins. April 15, 1861- President Lincoln issues a public declaration that an insurrection exists and calls for 75,000 militia to stop the rebellion.

What was the bloodiest battle of American history? Antietam, the deadliest one-day battle in American military history, showed that the Union could stand against the Confederate army in the Eastern theater.

Did Confederate soldiers have a choice? While most Confederate soldiers were volunteers, representing all social classes, more than ten percent were conscripts, men drafted into military service against their will.

Who won the Civil War? The Union (also known as the North) won the American Civil War. The main reasons for the Union's victory were its superior resources (including manpower), transportation, and industrial capacity, as well as the effective leadership of President Abraham Lincoln and the military strategies of General Ulysses S. Grant.

Was the Civil War fought over slavery? Today, most professional historians agree with Stephens that slavery and the status of African Americans were at the heart of the crisis that plunged the U.S. into a civil war from 1861 to 1865.

Who believed slavery was wrong and should be illegal? An abolitionist, as the name implies, is a person who sought to abolish slavery during the 19th century. More specifically, these individuals sought the immediate and full emancipation of all enslaved people.

What US President was also a Civil War general? In 1865, as commanding general, Ulysses S. Grant led the Union Armies to victory over the Confederacy in the American Civil War. As an American hero, Grant was later elected the 18th President of the United States (1869–1877), working to implement Congressional Reconstruction and to remove the vestiges of slavery.

Who fired the first shot of the Civil War? Thus, Fort Johnson at Fort Sumter fired the first Civil War. Edmund Ruffin of Virginia was the man most often associated with the first shot. The 67-year-old secessionist was posted on nearby Morris Island with the Palmetto Guard.

Who was not allowed to fight in the Civil War? Despite the clear reasoning for the outbreak of the war, the Lincoln administration was hesitant to allow Black troops to shoulder arms and fight. Lincoln feared armed African Americans would cause a

panic in border states, potentially pushing them to join the Confederacy.

What was the number one cause of death during the Civil War? The number one cause of death during the Civil War was disease, specifically diarrhea and dysentery. Other major causes of death included direct combat and wounds, malnutrition, and becoming a prisoner of war.

Would slavery have survived without the Civil War? Without the Civil War, the abolition of American slavery surely would have come later than it did, perhaps a couple decades later. The United States might have been the last hold-out. There would have been mounting pressure on the South.

Why did the Civil War begin in April 1861? Unwilling to tolerate a U.S. garrison in Southern territory, Confederates began shelling the fort in the pre-dawn hours of April 12, 1861, and Union guns responded. The Civil War had begun.

Which of the following best describes the beginning of the Civil War? Beginning of the Civil War: The Civil War began on April 12, 1861, when Confederate forces fired upon Union troops stationed at Fort Sumter. The bombardment of Fort Sumter in Charleston's Harbor was a decisive event that sparked the full-scale war between the North and the South.

What advantages did the North have at the start of the Civil War? The Union had many advantages over the Confederacy. The North had a larger population than the South. The Union also had an industrial economy, whereas the Confederacy had an economy based on agriculture. The Union had most of the natural resources, like coal, iron, and gold, and also a well-developed rail system.

Who won the Civil War? The Union (also known as the North) won the American Civil War. The main reasons for the Union's victory were its superior resources (including manpower), transportation, and industrial capacity, as well as the effective leadership of President Abraham Lincoln and the military strategies of General Ulysses S. Grant.
