**What are the 5 aspects of prose?** The basic elements of prose are: character, setting, plot, point of view, and mood. Character refers to: biographical information; personality traits; social roles, and psychological factors such as aspirations, fears, and personal values.

**What is a prose technique?** In writing, prose is a style used that does not follow a structure of rhyming or meter. Rather, prose follows a grammatical structure using words to compose phrases that are arranged into sentences and paragraphs. It is used to directly communicate concepts, ideas, and stories to a reader.

**What is prose method?** Prose is written language that is unmetered, follows grammar rules, and is organized into sentences and paragraphs. Prose writing typically emulates natural speech, though this is not a requirement. Prose encompasses items such as novels, biographies, magazine articles, and other similar works.

**What are the first three steps of the paramedic method?**

**What is the reverse paramedic method?** The reverse paramedic method is a revision process used to identify unnecessarily wordy sentences that can be made more concise. It also helps to convert writing into passive voice.

**What is the paramedic approach to writing?** The Paramedic Method "is emergency therapy, a first aid kit, a quick, self-teaching method for translating "Official Style" English into "plain" English." Lanham provides clear steps to correct common writing problems. These are tools, not hard-and-fast rules, for writing clear, concise easier to read sentences.

**What is the lard factor in writing?** The Lard Factor: In his book *Revising Prose*, Richard Lanham encourages writers to calculate the Lard Factor of an edited piece of prose by subtracting the number of words in the edited sentence from the number of words in the original, then dividing the difference by the original.

**What is the paramedic method of conciseness?** The Paramedic Method is a seven step editing protocol originally created for professional writers. It can be used by anyone looking to eliminate redundancies, eliminate passive voice, and generally, make sentences more concise and easier to read.

**How do I fix my prose?**

**How do you fix choppy prose?**

**How can I make my prose flow better?**

**What do you call a person who writes a prose?** A person who write a prose is called as a “PROSAIST” . Unlike as in poetry,the writings of prosaist is unrhythmical collection of grammatically sorted words that intensify the thought of writer at the end of the whole content.

**What are the 3 types of prose?** Prose can come in different types: non-fictional prose, fictional prose, and heroic prose. Prose can be poetic, and it can also be used to write poetry. This is known as prose poetry.

**What are the 7 elements of prose?** These elements are character, plot, setting, theme, point of view, conflict, and tone. All seven elements work together to create a coherent story. When you're writing a story, these are the fundamental building blocks you should use. You can approach the seven elements in any order.

**What is an example of a famous prose?** There are thousands of famous examples of prose writing. Novels like The Hobbit by J.R.R. Tolkien are written in prose, as are short stories like "The Lottery" by Shirley Jackson.

**What is the prose format?** In writing, prose refers to any written work that follows a basic grammatical structure (think words and phrases arranged into sentences and paragraphs). This stands out from works of poetry, which follow a metrical structure (think lines and stanzas).

**How to analyze a prose?**

**How to teach prose effectively?** The teacher has to expose clear and explain the new words, difficult words, structures, idioms, phrases and other grammatical items. The exposition of all these items and their clarification is the main purpose of prose teaching. and which he thinks need more repetitive and elaboration.

**What technique is prose?** Prose is a form of writing or speaking that follows natural flows of speech and grammar, that is, it is written ordinarily, without intended metrical

structure. We can see prose in action every day in conversations, textbooks and newspaper articles.

**Why is prose easy?** Also, you don't have to rhyme in prose writing. Although it is not necessary that a poem has a rhyme scheme, but it does have a rhythm. Lastly, in poetry, you have to put in more and more meaning in less words.

**What is the paramedic method of grammar?** Basic Steps of the Paramedic Method (slightly modified) Ask "Where's the action?" Ask, "Who's Kicking Who? Clarify the real "actor" (subject) and the real "action" (verb). Revise the sentence putting these two--the actor and action (subject and verb)--together. Be sure to use an active verb.

**What is the lard factor?** In fact, Lanham has a formula he calls the "Lard Factor," which he uses to score memos and reports. The formula works this way: if a paragraph of 100 words can be edited down to 50 words and still convey the same meaning, the original paragraph is said to have a lard factor of 50 percent.

### **1. Define photosynthesis and explain the two stages involved.**

- **Photosynthesis** is the process by which plants use sunlight to convert carbon dioxide and water into glucose and oxygen.
- It occurs in two stages:
  - **Light-Dependent Reactions:** occur in the thylakoid membranes of chloroplasts and use sunlight to produce ATP and NADPH.
  - **Light-Independent Reactions (Calvin Cycle):** occur in the stroma of chloroplasts and use ATP and NADPH to fix carbon dioxide into glucose.

### **2. Describe the role of enzymes in metabolic reactions.**

- **Enzymes** are biological catalysts that increase the rate of metabolic reactions without being consumed.

- They decrease the activation energy required for reactions, allowing them to proceed faster.
- Enzymes are specific for particular substrates and have active sites where the substrates bind.

### 3. Explain the concept of negative feedback and provide an example in the human body.

- **Negative feedback** is a regulatory mechanism that counteracts changes in a system.
- For example, in the human body, when blood pressure increases, the baroreceptors in the walls of blood vessels detect the change and send signals to the brain.
- The brain then triggers the release of hormones that reduce blood pressure, returning it to normal.

### 4. Discuss the importance of genetic diversity in populations.

- **Genetic diversity** refers to the variation in genetic traits within a population.
