Solving for Happy: A Q&A with Mo Gawdat

In his book "Solve for Happy," Mo Gawdat, former Chief Business Officer of Google X, offers a pragmatic approach to finding happiness in life. Here's a Q&A with him:

1. What's the basis of your happiness formula?

My happiness formula is derived from the idea that happiness is the natural state of being when we are not clouded by our fears and our expectations. To achieve happiness, we need to let go of the notion that we can control the external world and focus on what we can actually control: our own thoughts and actions.

2. How do we eliminate external factors that affect our happiness?

We can't eliminate external factors altogether, but we can control how we respond to them. By recognizing that our happiness is not dependent on external circumstances, we can detach ourselves from negative events and focus on the positive aspects of life.

3. What role does purpose play in happiness?

Purpose is essential for a fulfilling life. When we know what we're meant to do, our actions become more meaningful and contribute to our overall happiness. To discover our purpose, we need to introspect and explore our passions, values, and strengths.

4. How do we deal with negative thoughts and emotions?

Negative thoughts and emotions are part of life. Instead of suppressing them, we should acknowledge and observe them. When we allow our emotions to flow through us without judgment, we can understand their root causes and take steps to address them.

5. What's your advice for those struggling to find happiness?

Start by practicing gratitude for the things you already have. Focus on the present moment and appreciate the simple pleasures of life. Let go of expectations and strive to live a life aligned with your values. Remember, happiness is a journey, not a destination, and it requires consistent effort and self-reflection.
