**What is theory of relativity short summary?** General relativity is a physical theory about space and time and it has a beautiful mathematical description. According to general relativity, the spacetime is a 4-dimensional object that has to obey an equation, called the Einstein equation, which explains how the matter curves the spacetime.

**What is the simply explained theory of relativity?** What is general relativity? Essentially, it's a theory of gravity. The basic idea is that instead of being an invisible force that attracts objects to one another, gravity is a curving or warping of space. The more massive an object, the more it warps the space around it.

**Why was Dylan homeless in Theories of Relativity?** He was kicked out of his home by his mother, who wished to impress her new boyfriend, and having Dylan there would only ruin her chances. Dylan's usual place to stay is in a plaza in front of two office towers in the downtown of a major city.

**Why was the theory of relativity controversial?** Reasons for criticism of the theory of relativity have included alternative theories, rejection of the abstract-mathematical method, and alleged errors of the theory. According to some authors, antisemitic objections to Einstein's Jewish heritage also occasionally played a role in these objections.

**How to explain the theory of relativity to kids?** " The motion of one thing is always relative to the motion of everything else. Special relativity also says that light always travels at the same speed in empty space, 186,000 miles per second. So in one second, light could travel all the way around the planet Earth about seven and a half times!

**Who is Jenna in Theories of Relativity?** Dylan begs on the streets, where he meets Glen, who is president of a technology company in the building Dylan begs in front of. Dylan is also friends with Jenna, a young teenage girl who is also recently homeless, and Twitch, a late-teens boy who is illiterate and addicted to drugs.

Visibly, Dylan's socioeconomic status is unquestionably low. Glenn cheerfully offers Dylan a job, Dylan is dazed at the offer and cannot help but ask why.

**What are the Theories of Relativity 2?** Relativity is two related theories: special relativity, which explains the relationship between space, time, mass, and energy; and general relativity, which describes how gravity fits into the mix. Albert Einstein proposed these theories starting in 1905.

**What is the paradox in the theory of relativity?** For example, suppose that one of two identical twin sisters flies off into space at nearly the speed of light. According to relativity, time runs more slowly on her spacecraft than it does on Earth; therefore, when she returns to Earth, she will be younger than her Earth-bound sister.

**What is Dylan's theory about every fourth person who walks by?** At least he has his theories. No one can take those away from him. Like how every fourth person throws him spare change; how no one does anything for anyone without a price; and how he just might be able to find a place in this complicated world.

**How did Albert Einstein find out about the theory of relativity?** He was guided by the few clues he had at hand: his earlier results of 1907-1912 on static gravitational fields, the requirement that the theory merge back into Newtonian theory and the requirement of conservation of energy and momentum. Einstein eventually found equations that he believed adequate.
