

COMPUTER FUNDAMENTALS QUESTIONS AND ANSWERS

[Download Complete File](#)

What is computer fundamentals short answer? Computer fundamentals refers to the basics of using digital devices such as computers, smart phones and tablets. “Computer” used to only refer to the basics of using a computer and associated devices; however, it has since expanded to include most frequently-used digital devices.

What are the basic questions of computers?

What is a MCQ computer? The Computers MCQ (Multiple Choice Questions) is an excellent resource for individuals seeking to enhance their understanding of various computer-related topics.

What is the correct definition of computer Mcq? Explanation: A computer is a machine or device that can be programmed to perform arithmetical or logic operation sequences automatically.

What are the 5 basics of a computer?

What are the 4 fundamentals of computer? Functionalities of Computer Step 1 ? Accepts data as input. Step 2 ? Saves the data/instructions in its memory and utilizes them as and when required. Step 3 ? Execute the data and convert it into useful information. Step 4 ? Provides the output.

What is RAM in a computer? Random-access memory, or RAM, is one of the most important parts of your computer. It provides high-speed, short-term memory for your computer's CPU. The amount of computer memory you need depends on what you

use your computer for, but 12 GB of RAM is a good general minimum standard.

What is the most basic computer knowledge? Basic computer skills include understanding how to navigate the operating system, using word processing software for writing documents, creating and managing spreadsheets, sending and receiving emails, browsing the internet, and basic file management such as creating folders and organizing files.

What are the basic concepts of a computer? All basic computers consist of four functions: input, storage, processing and output. IPO is often called IPOS or input, process, output, storage. The computer receives input, processes the input as per user instructions and provides output and can be stored in a desired format.

What is mean by computing fundamentals? The Computing Fundamentals examination covers a foundational understanding of computer hardware, software, operating systems, peripherals, and troubleshooting to help you get the most value and impact from computer technology.

What is the fundamental definition of a computer? A computer is an electronic device that manipulates information, or data. It has the ability to store, retrieve, and process data. You may already know that you can use a computer to type documents, send email, play games, and browse the Web.

What is the computer short answer? What is a computer? A computer is a machine that can store and process information. Most computers rely on a binary system, which uses two variables, 0 and 1, to complete tasks such as storing data, calculating algorithms, and displaying information.

What is meant by CS fundamentals? This course introduces students to three major areas of the computer science discipline: theory and algorithms, hardware systems, and software systems. In the theoretical component of the course, you and your classmates will learn about algorithms, Boolean algebra, binary mathematics, and theory of computation.

What is leadership according to Gary Yukl? Gary Yukl (2006) defines leadership as “the process of influencing others to understand. and agree about what needs to be done and how to do it, and the process of facilitat- ing individual and collective

efforts to accomplish shared objectives” (p. 8).

What is Yukl's leadership matrix? Yukl's (2013) leadership matrix is a hierarchical representation of leadership at different organizational levels. The matrix consists of four levels: General managerial work functions: This level includes the basic managerial functions of planning, organizing, staffing, directing, and controlling.

What are the different types of teams according to Yukl 2013? It is essential to consider that there exist many different types of teams. According to Yukl et al. (2012), there are four clear types of teams: functional teams, cross-functional teams, self-management teams, and top executive teams.

What are the 5 qualities of a good leader?

What are the 7 definitions of leadership?

How do you define leadership? Leadership is a set of behaviors used to help people align their collective direction, to execute strategic plans, and to continually renew an organization.

What is the Matrix of Leadership? The Matrix of Leadership (???????????????, R?d?shippu no Matorikusu) is an artifact of great power, traditionally created by the makers of the AllSpark and Cybertron which was also traditionally given to the leader of the Autobots.

What are the four proactive core tactics? These studies found that the proactive tactics most likely to elicit task commitment include rational persuasion, consultation, collaboration, and inspirational appeals. The four tactics have subsequently been termed core tactics (Yukl, 2002).

What is the Yukl's leadership taxonomy? A leadership taxonomy describes relevant task- and relations-oriented leadership behaviors (Yukl et al., 2002). By task orientation, Yukl et al. (2002) understand that a leader achieves goals efficiently and reliably together with his team members through his corresponding behavior.

What are the 8 leadership styles pdf? The leadership styles examined include: transforma-tional, transactional, autocratic, laissez-faire, charismatic, servant, democratic and pace-setting leadership.

What is the definition of a leadership style? A leadership style refers to a leader's methods, characteristics, and behaviors when directing, motivating, and managing their teams. A leader's style is shaped by a variety of factors, including personality, values, skills, and experiences, and can have a significant impact on the effectiveness of their leadership.

How do you define leadership? Leadership is a set of behaviors used to help people align their collective direction, to execute strategic plans, and to continually renew an organization.

What is leadership according to the behavior model? Behavior leadership theory focuses on how leaders conduct themselves with tasks and people. It suggests successful leaders learn and adopt specific behaviors rather than have certain innate traits. These behaviors influence people's actions and performance.

What is the concept of leadership? Leadership is a fascinating concept that has captivated humans throughout history. It is the art of guiding and influencing individuals or groups towards a common goal. Leaders possess a unique ability to inspire, motivate, and guide others, allowing them to achieve greatness collectively.

How is leadership defined by Jocko? Our CEO, Jocko Willink, defines a leader as this: "If you interact with other humans in any capacity, you are leader. And you have to influence them to work together to accomplish a goal." You don't have to be the senior person in charge of the team. You don't have to have a title or rank in your organization.

How to calculate injection molding part cost?

How much does it cost to injection mold parts? Injection molding cost can range anywhere from \$100 to \$100,000+ depending on the scope and intricacy of the project. A small and simple single-cavity plastic injection mold usually costs between \$1,000 and \$5,000. Very large or complex molds may cost as much as \$80,000 or more.

How do you estimate cycle time for injection molding? The formula is: Cycle time = clamping time + injection time + cooling time + ejection time The clamping time is the time it takes to close and open the mold. The injection time is the time it

takes to fill the mold cavity with molten plastic.

How to make injection molding cheaper?

How do you calculate cost per part? Breaking Down the Cost Per Unit Formula
The cost per unit formula is simple: total production costs divided by the number of units produced. The total production cost is found by adding up the total fixed cost and the total variable cost.

What is the profit margin for injection molding? For plastics processors like injection molders, extrusion companies, blow molders, etc., profit margins can be thin. In the injection molding industry for example, margins of 6-7% are pretty typical. Of course some plastics manufacturers have profits higher than average, some lower. That's true in every industry.

How much does injection moulding cost per unit? In general, injection moulding tooling can cost from £2k to £100k. Costs for moulded parts can range from a few pence to a hundreds of pounds each.

What is the hourly rate for injection molding?

How to save cost in injection moulding? It sounds simple, but one of the easiest ways to reduce price-per-piece cost in injection moulding is by increasing part quantity. That is because the initial upfront cost to design and machine the mould amortises over more parts.

How to reduce injection molding cycle time? You should select a material that has a low melting point, a high cooling rate, a low shrinkage, and a low viscosity, as these properties can help reduce the injection, cooling, and ejection stages of the cycle.

How long does it take to injection mold a part? The whole injection moulding process usual lasts from 2 seconds to 2 minutes. There are four stages in the cycle. These stages are the clamping, injection, cooling and ejection stages.

What is the machine hour rate of injection molding? The machine hour rate is similar to the labour hour rate method and is used where the work is performed primarily on machines. If factory overhead is Rs 3, 00,000 and total machine hours

are 1,500, the machine hour rate is Rs 200 per machine hour ($\text{Rs } 3,00,000 \div 1500$ hours).

How to calculate injection mould cost? Therefore, the price of a mold = material cost + manufacturing cost + overhead cost + profit + tax + technical value ; expedited production cost = mold cost + profit + tax + technical value and crash cost. Among them, mold cost = material cost + manufacturing cost + overhead cost.

How much does it cost to injection mold a part? The plastic injection molding process can cost anywhere from \$3,000 to \$100,000 or more. Simple molds are typically in the \$3,000 and \$6,000 range while the price for large, more complex, high-production, or multi-cavity molds can cost \$25,000 to \$50,000 or more.

What is a low cost alternative to injection molding? Thermoforming Manufacturing Thermoforming is a good alternative to injection moulding for 'relatively' simple plastic parts like packing containers, vehicle door panels, and dashboards in low-to-mid volumes. It involves creating a simple single-sided mould of the product.

How do you calculate part manufacturing cost? The formula for calculating total manufacturing cost is quite simple. Total manufacturing cost = direct materials + direct labor + manufacturing overhead. What are the three types of manufacturing costs? The three basic types of manufacturing costs are direct materials, direct labor, and manufacturing overhead.

How much does injection moulding cost per unit? In general, injection moulding tooling can cost from £2k to £100k. Costs for moulded parts can range from a few pence to a hundreds of pounds each.

What is the formula for injection molding?

How do you calculate part weight in injection molding? Once the volume is known then part weight will be: $VD + x \% (VD) = (1+x) VD$ where D is the density selected injection molding material in $[\text{g}/\text{cm}^3]$, $(1+ x)$ representing the sprue and runners weight with 020% (VD).

Sepedi Idioms and Riddles: Unraveling the Wisdom and Wit

Sepedi, a Bantu language spoken in South Africa, is rich in idioms and riddles that reflect the culture, values, and humor of its people. These expressions offer insights into the Sepedi worldview and serve as a treasure trove of wisdom and entertainment.

Question: What is the Sepedi idiom for "a foolish person who is easily tricked"?

Answer: "Motho ya mawere a tšwa magareng." (A person with eyes that come out of the forehead)

Question: Can you solve this Sepedi riddle: "Ke ntho e kgolo, e na le maoto a manè. E sa tsamaye, gongwe e tsamaye le batho ga e sa le motswere." (It is big, has four legs. It doesn't walk, sometimes it walks with people while still a child)

Answer: "Seta." (A table)

Question: What does the Sepedi idiom "Ho thuša ngwana leraga" mean?

Answer: "To help a child build a house." (To waste one's time on a futile task)

Question: Riddle: "Ke leleme le se nang molomo, ke mahlo a se nang hlooho." (I am a tongue without a mouth, I am eyes without a head.)

Answer: "Lenaka." (A mirror)

Question: What is the Sepedi idiom for "a person who is always in trouble or unlucky"?

Answer: "Ngoana wa Modimo ga a hwele." (God's child doesn't get lost.)
