

# A study of dual credit access and effectiveness in the

## [Download Complete File](#)

**How is the dual credit program different from the AP program?** Dual enrollment allows high school students to begin undergraduate classes for credit. Unlike Advanced Placement (AP) classes, which award credit based on a test, dual enrollment courses award credit as long as the student passes the class.

**Does Texas A&M accept dual credit from high school?** Our dual credit students take college-level courses taught by fully credentialed faculty. These courses satisfy high school graduation requirements and provide college credit at the same time. Your ISD will award high school academic credit. A&M-Commerce will award college-level academic credit.

**Does Stanford accept dual enrollment credits?** Some students may opt to take certain classes over the summer or as dual enrollment courses. That is perfectly okay. The Additional Information section of the Common Application is an available space if students want to provide further context on their course schedule.

**What is dual enrollment in California?** Dual Enrollment Lets You Earn College Credit While Still In High School. Dual enrollment provides students the unique opportunity to take community college classes while still in high school.

**Is AP harder than dual credit?** Generally, Dual Enrollment classes may be less academically rigorous compared to AP classes, as AP is designed for high academic achievers and has a standardized, structured curriculum. However, the rigor of Dual Enrollment can vary by institution.

**Do Ivy Leagues prefer AP or dual enrollment?** Additionally, it demonstrates your ability to multitask and manage your time effectively. However, it's important to keep in mind that Ivy League institutions and other highly selective schools may still place a stronger emphasis on AP classes, due to them being nationally recognized.

**Do colleges prefer AP or DC?** In determining admissions, colleges do not prefer dual enrollment over AP classes or vice versa.

**Does Harvard accept high school dual enrollment credits?** Harvard does not grant credit for college coursework that you have completed before you matriculate at the school. In other words, if you have credit from your AP tests, IB exams, or dual credit classes in high school, you will not be granted credit at Harvard.

**Does dual credit raise your high school GPA?** 8. Grades from Dual Enrollment courses can boost high school GPAs – but the treatment varies. Usually, they are treated like Honors courses and can bump your high school GPA (if allowed) by up to 0.5.

**Does Johns Hopkins accept dual enrollment credits?** First-time full-time undergraduate students may transfer a maximum of nine credits through Advanced Placement, International Baccalaureate, or dual enrollment to their degree programs.

**Does dual credit transfer to MIT?** Credit for a Subject Already Taken Note that transfer credit cannot be awarded for work done in your high school, only for work done at a college or university. Most on-line classes and dual-enrollment subjects are similarly not eligible for transfer credit.

**What GPA is required for Stanford?** To have the best shot of getting in, you should aim for the 75th percentile, with a 1570 SAT or a 35 ACT. You should also have a 3.95 GPA or higher. If your GPA is lower than this, you need to compensate with a higher SAT/ACT score.

**Does UCLA accept dual credit?** Yes, UCLA does accept credits from many dual enrollment programs. However, they evaluate these credits on a course-by-course basis to ensure they align with the curricula offered at the university.

**Is getting AB in a dual enrollment class bad?** Poor grades in dual enrollment courses can hurt students' chances of receiving financial aid as well as their eligibility to enroll in a four-year college or university. Dual enrollment courses may count toward a total unit cap on financial aid or course enrollment limits.

**Does dual enrollment look good on college applications?** So yes, depending on their grade in the class (B- or higher, unless you're enrolling in a community college, then it would be a C- or higher), dual enrollment will look good when applying to colleges.

**Are dual enrollment classes weighted the same as AP?** No, they aren't weighted at all - and their really hard classes from what I hear. Some told me that the classes are harder than the AP's.

**Which is better, AICE or dual enrollment?** Finally, keep this all-important point in mind as you plan which high school courses you're going to take: colleges value rigor of curriculum above all else, so taking AP, IB, or AICE serves you better than enrollment in Honors and most Dual Enrollment classes.

**What is the difference between AP and concurrent enrollment?** If a student fails an AP class, that class is not recorded on a permanent college transcript. Concurrent enrollment carries a slightly higher risk than AP. Grades earned in a concurrent enrollment class (including failing grades and withdrawals) become part of a student's permanent academic record.

**Does dual enrollment look good on college applications?** So yes, depending on their grade in the class (B- or higher, unless you're enrolling in a community college, then it would be a C- or higher), dual enrollment will look good when applying to colleges.
