

# Architecture and power in the ancient andes the archaeology of public buildin

## [Download Complete File](#)

**What is architecture and power in the ancient Andes?** Architecture and Power in the Ancient Andes uses analytical methods to approach architecture and its relationship to Andean society, exploring three themes in particular: the architecture of monuments, the architecture of ritual, and the architecture of social control.

**What is the architecture of the Andes?** The best-known architecture in the Andes is that of the Inka. The Inka used stone for all of their important structures, and developed a technique that helped protect the structures from earthquakes. Because of its stone construction, Inka architecture has survived more easily than the adobe architecture of the coast.

**What is the relationship between architecture and archaeology?** Archaeology and architecture are two fields that are often intertwined. Architecture involves the design and construction of buildings and other structures, while archaeology is the study of human history and culture through the examination of artifacts and other physical remains.

**What is architectural archeology?** Introduction. Building archaeology is the discipline of reconstructing the history of existing buildings using direct observations. Archaeologists can trace a structure's past by analysing data such as materials, building techniques, how elements connect with one another, and so on.

**What is the most famous architectural work of the Andean civilization?** On another level, Inca architects also very often sought to harmoniously blend their structures into the surrounding landscape. Perhaps the most famous example of this

is Machu Picchu, which follows the contours of the hillside and even incorporates natural features such as large rocks into the actual buildings.

**What is the ancient civilization of the Andes?** The three main Andean civilizations were the Caral, the Chavin, and the Inca. It is believed to be the oldest urban center in the Americas and peaked around 2300 BCE.

**What is unique about the Andes?** 1) The Andes are the longest mountain range in the world. They stretch for over 7,000 kilometers from Colombia to Chile. 2) They are home to the highest mountain in the Western Hemisphere, Aconcagua. Aconcagua is located in Argentina, and it reaches a height of 6,962 meters!

**What did the people of the Andes civilization build?** The Andean civilizations were noteworthy for monumental architecture, an extensive road system, textile weaving, and many unique characteristics of the societies they created.

**What is the structure of the Andes mountains?** The Andes consist of a vast series of extremely high plateaus surmounted by even higher peaks that form an unbroken rampart over a distance of some 5,500 miles (8,900 kilometers)—from the southern tip of South America to the continent's northernmost coast on the Caribbean.

**What can architecture tell us about a civilization?** As a part of a civilization, our architecture often marks shifts in the way people think, live, work, and thrive. World architecture shows the movement and growth of communities.

**How is architecture related to history?** Modern architecture has grown and developed from centuries of innovation and invention from past civilizations. And while new technology has meant for dramatic changes in how we live and function as a society, many of the basic concepts of architecture still draw on how ancient civilizations operated.

**Why is anthropology important in architecture?** Study of anthropology guides an architect to relate the architectural aspects of a building to the people who will inhabit the building. An architect uses anthropology to understand how architecture influences peoples, how it makes people, how it shapes them and how it sustains social relations between people.

ARCHITECTURE AND POWER IN THE ANCIENT ANDES THE ARCHAEOLOGY OF PUBLIC BUILDING

**What is the difference between archeology and archaeology?** Archeology and archaeology are both English terms. Archeology is predominantly used in ?? American (US) English ( en-US ) while archaeology is predominantly used in ?? British English (used in UK/AU/NZ) ( en-GB ). In the United States, there is a 66 to 34 preference for "archaeology" over "archeology".

**What are the 5 stages of archeology?** It's a lengthy process, but each step can be sorted into the following categories: Discovery of a Site, Mapping the Site, Excavating, Artifact Analysis & Interpretation, and Publication & Curation.

**What are the 3 types of archaeologist?** There are three main branches of study: prehistoric archaeology (cultures that do not have writing); protohistoric archaeology (cultures that have incomplete records); and historic archaeology (cultures that have well-developed historical records). As such, these branches of archaeology value different types of data.

**What was the most powerful Andean civilization?** At their most powerful, the Inca had the largest empire in the world at the time—today, it's still the largest empire to ever exist in the Americas. Stretching from modern-day southern Colombia to southern Chile, they ruled over western South America from the Andes to the Pacific Ocean.

**Why was Machu Picchu abandoned?** Disease and Epidemics. One theory posits that diseases brought by the Spanish conquistadors, such as smallpox and influenza, devastated the Inca population. Epidemics likely ravaged the region, leading to a drastic decline in the inhabitants of Machu Picchu and contributing to its eventual abandonment.

**What is the earliest evidence for monumental architecture in Andean South America?** Multidisciplinary geoarchaeological research in northern Peru shows that the earliest known standing adobe brick architecture in the Andes dates before 5,100 calendar years B.P., using adobes cut from natural clay deposits created by El Niño flooding.

**What is the Andes most known for?** The Andes is the world's longest range of mountains and runs north to south along the Pacific Ring of Fire and seven countries

BUILDING

from Venezuela to Chile. It is known for its several volcanoes, the origin of malaria treatment, and ruins of many ancient civilizations.

**What is the oldest city in the Andes?** The 5000-year-old 626-hectare archaeological site of The Sacred City of Caral-Supe is situated on a dry desert terrace overlooking the green valley of the Supe river. It dates back to the Late Archaic Period of the Central Andes and is the oldest centre of civilization in the Americas.

**What is known as a famous and mysterious ancient city in the Andes?** The Inca also built Machu Picchu, a famous and mysterious ancient city in the Andes. They thrived for centuries before being conquered by the Spanish in 1532.

**Who built a powerful empire in the Andes Mountains?** Five hundred years ago, a great empire stretched along the Andes mountains and the Pacific coast of South America. Ruled by a group called the Inca, this empire united many diverse cultures of the mountain and coastal regions.

**Why was architecture important to the Incas?** The Incas also developed an extensive road system spanning most of the western length of the continent and placed their distinctive architecture along the way, thereby visually asserting their imperial rule along the frontier. Wall of the Coricancha temple, at Cuzco, the capital city of the Inca Empire.

**What historic empire held power in the Andes?** At their most powerful, the Inca had the largest empire in the world at the time—today, it's still the largest empire to ever exist in the Americas. Stretching from modern-day southern Colombia to southern Chile, they ruled over western South America from the Andes to the Pacific Ocean.

**What did the people of the Andes civilization build?** The Andean civilizations were noteworthy for monumental architecture, an extensive road system, textile weaving, and many unique characteristics of the societies they created.
