**What oil does a BMW transmission take?** ATF Dexron III is the fluid standard for 4-speed BMW automatics (ZF 4HP). This is also the most common ATF you will find at auto parts stores (it's compatible with most GM and Ford auto transmissions).

**What transmission is in an E34?** Transmission options were a 6-speed manual or a 5-speed automatic.

**What is ATF oil in my manual BMW?** On Redline's website itself, their application guide for our 1M's recommends the use of their 'D6 ATF'. And I know ATF stands for 'automatic transmission fluid' but on the rear of the bottle it does say for manual transmissions too.

**How much oil does a BMW E34 take?** Note: Oil capacity for the 2.5L/2.7L M20 engine is 4.2 Liters.

**What color is ATF oil BMW?** Brand-new fluid: Dark red. Normal: Darker brick red.

**What kind of transmission fluid does a BMW E46 take?** ATF is used to fill the automatic transmission but also fills the torque converter, an integral component for transferring engine power to the transmission.

**What is the fastest E34?** Short of the M5, the 540i/6 is the quickest e34.

**What BMW is E34?** The E34 5-Series followed the E28 and was introduced in 1988. The Touring station wagon was introduced in 1992. The E34 saw the first 6-speed manual, V8 engines, and AWD introduced to the 5-series line.

**What does E34 mean?**

**Can I put ATF in a manual?** Will automatic transmission fluid work in a manual transmission? Yes – provided the original equipment manufacturer recommends it. It's important to check your owner's manual to make sure before dumping ATF in your manual transmission. In fact, some manuals may call for a gear lube or even a motor oil in older units.

**Can I use ATF instead of gear oil?** A straightforward answer would be No because gear oil and transmission fluid target different types of transmissions or mechanical environments. Gear oil is a lubricant for manual transmission while transmission fluid is a lubricant for the automatic transmission of semi-trucks and other heavy and light-duty vehicles.

**Is ATF the same as transmission oil?** Yes but often automatic transmissions use Automatic Transmission Fluid and not Automatic Transmission Oil (ATF) because ATF has a bit high coefficient of friction then oil that is used in the differential or oil used in a standard transmission.

**How much oil does a E34 differential take?** My E34 540i takes 1.9L of 75W-90 oil and I chose to use a good quality synthetic.

**Is 5W 30 for BMW?** To answer you question, the 5W-30 BMW oil will work excellent, it is full synthetic and used across most BMWs other than the M cars' 10W-60. I'd stick to that, or if you want get a LL-01 full synthetic from Castrol, which is BMW's supplier.

**How much oil does a E34 m30 take?** 6.1 quarts (with filter).

**What is ATF on BMW?** Automatic transmission fluid (ATF) is a specialized hydraulic fluid that is essential for the proper functioning of vehicles equipped with automatic transmissions. Usually, it is coloured red or green to differentiate it from motor oil and other fluids in the vehicle.

**Should I change BMW transmission fluid?** Your BMW's transmission fluid is supposed to be replaced between every 30 to 60 thousand miles, and if it isn't, then it may start to smell. A sweet or burning odor could be the transmission fluid (although it could also be the coolant.)

## **How do I check my BMW ATF level?**

**Are all BMW transmissions the same?** Depending on the model, your BMW has an automatic transmission, a Steptronic transmission or a Steptronic sport transmission.

**What kind of oil does a BMW E46 manual gearbox take?** Red Line MTL Manual Transmission Fluid/Oil Red Line 70W/80W GL-4 MTL gear oil (SAE 5W30/10W30 engine oil viscosity) designed for use in BMW manual transmissions.

**Which transmission is used in BMW?** With the BMW Steptronic transmission system, you get the best of both worlds. Experience manual paddle shifting when you want it and a multi-drive mode automatic when situations call for it.

**Is E34 a classic car?** Join us on this journey back in time as we explore the evolution, design and features that make the BMW E34 a true timeless classic.

**How many BMW E34 were made?** The production plants for the E34 were the Dingolfing plant in Germany and Rosslyn in South Africa. Total production was 1,333,412 units.

**Is the E34 M5 rare?**

**What grade of gear oil does a BMW take?** 75w-140(2) 75w-80(4)

**Do you need to change BMW transmission oil?** Your BMW's transmission fluid is supposed to be replaced between every 30 to 60 thousand miles, and if it isn't, then it may start to smell. A sweet or burning odor could be the transmission fluid (although it could also be the coolant.)

**What type of transmission does BMW use?** The automatic transmission in your BMW is designed for normal driving and is very comfortable to handle. The Steptronic Sport transmission, on the other hand, is designed to be particularly sporty.

**What type of transmission fluid for BMW 320i?** Types of BMW 320i Transmission Fluid Dexron VI ATF. Red Line D6 ATF. Pentosin ATF 1 LV. Castrol Transmax ATF.

**Can I use SAE 30 for gearbox?** You can use TITAN UTTO TO-4 SAE 30 in powershift transmissions, gearboxes, final drives, and hydraulic systems. Especially where the manufacturer dictates the use of CATERPILLAR TO-4 oil in the viscosity grade of SAE 30.

**Which gearbox oil is recommended?** TRANSMISSION TM 80W-90: Gear oil particularly designed for gear boxes, axles and transfer boxes. Specifically designed for highly loaded hypoid gears, with standard drain interval. Suitable for applications requesting a MIL-L-2105D or API GL-5 specification.

**Which grade oil is used in transmission?** Transmission oils with SAE 80W-90 and 85W-90, which are still widespread, are mainly produced from mineral base oils. For thicker oils such as 80W-140 an additional shear-stable viscosity index improver is needed to meet the cold flow requirements down to -26°C.

**Is BMW transmission fluid lifetime?** Despite the claims that transmission fluids last a 'lifetime,' it is recommended to change the transmission fluid every 60,000km. Adhering to the service intervals from gearbox manufacturers, not just the dealership's claim of a 'lifetime fill,' is vital for maintaining your transmission's health.

**How do I know if my BMW is low on transmission fluid?** If the transmission fluid is lower than it should be, symptoms often show up. You might notice that it feels like it drops out of gear while you drive, resulting in the RPMs flaring.

**How do I know if my BMW transmission is bad?**

**What is the strongest BMW gearbox?** The G420 is one of the strongest BMW transmissions to date. Able to handle 600+ HP these transmissions are unbelievably reliable in high horsepower applications.

**Does BMW use ZF transmission?** Manufacturers from Aston Martin, Chevrolet, Alfa Romeo, Dodge, Ford and BMW all rely on ZF transmissions to function. You would never think there was anything in common with a Ford F-150 and Rolls Royce – but they both often contain a ZF gearbox.

**How do I know what transmission is in my BMW?** Many modern BMW transmissions now use an adhesive label on the transmission pan housing. This

label contains the part number of the transmission fluid required for the vehicle. The transmission fluid part number also cross correlates with the manufacturer that made the transmission.

**What is the meaning of ATF in BMW?** Automatic transmission fluid (ATF) is a hydraulic fluid that is essential for the proper functioning of vehicles equipped with automatic transmissions. Usually, it is coloured red or green to differentiate it from motor oil and other fluids in the vehicle.

**Does BMW recommend transmission fluid change?** For most manual transmissions, you should change your fluid every 30,000 to 60,000 miles; for most automatic transmissions, you should change your fluid every 60,000 to 100,000 miles.

**Are all BMW transmissions the same?** Depending on the model, your BMW has an automatic transmission, a Steptronic transmission or a Steptronic sport transmission.
