The Wizard Within: The Krasner Method of Clinical Hypnotherapy

What is the Krasner Method of Clinical Hypnotherapy?

The Krasner Method is a groundbreaking approach to hypnotherapy developed by Dr. Leonard Krasner. It is based on the belief that everyone possesses an inner "wizard" or subconscious mind with the ability to solve problems, heal the body, and create positive change.

How does the Krasner Method work?

The therapist guides the client into a state of deep relaxation and trance, allowing the wizard within to emerge. Through guided imagery and suggestions, the therapist helps the client access their subconscious mind and its vast resources. This enables them to identify and release underlying issues that may be contributing to their problems.

What is the role of the therapist?

The therapist acts as a facilitator, helping the client to connect with their inner wizard. They create a safe and supportive space where the client can explore their subconscious and unlock their potential. The therapist does not "do" the work for the client but rather guides them on their own journey of self-discovery and healing.

What conditions can the Krasner Method help with?

The Krasner Method has been shown to be effective in treating a wide range of issues, including:

- Anxiety and stress
- Depression
- Phobias
- Trauma
- Chronic pain
- Weight loss

- Smoking cessation

Is the Krasner Method safe?

Yes, the Krasner Method is considered a safe and effective form of hypnotherapy. It does not involve any medication or invasive procedures and has minimal side effects. However, it is important to work with a qualified and experienced hypnotherapist to ensure that the method is used appropriately and safely.
