6th Grade Earth Science Syllabus: Mr. Watkins

Paragraph 1: Course Overview

This 6th-grade Earth Science course emphasizes hands-on exploration, inquiry-based learning, and critical thinking to deepen students' understanding of the Earth and its systems. Students will investigate topics related to geology, astronomy, meteorology, and ecology.

Paragraph 2: Unit 1: The Earth's Structure and Composition

- What is the Earth's interior like, and how do we know?
- How do different types of rocks and minerals form?
- How has the Earth's crust changed over time?

Paragraph 3: Unit 2: The Earth's Atmosphere and Weather

- What is the Earth's atmosphere composed of, and how does it affect life?
- How do different weather patterns form?
- What causes severe weather events, such as hurricanes and tornadoes?

Paragraph 4: Unit 3: The Solar System and Beyond

- What are the characteristics and motions of the planets in our solar system?
- How does the Sun influence Earth and the other planets?
- What are some of the key features and mysteries of space, including stars, galaxies, and black holes?

Paragraph 5: Unit 4: Earth's Ecosystems and Human Impact

- What are the major biomes of the Earth, and how do they differ?
- How do living organisms interact with each other and their environment?
- How has human activity affected Earth's ecosystems, and what are the potential consequences?
