How many publications to match general surgery?

What is the most common general surgery?

What are the odds of matching for general surgery?

What are the hardest residencies to match into? What are the most competitive residencies? Competitive residencies are often specialties requiring extensive training, such as plastic surgery, thoracic surgery, and radiology. Their competitiveness stems from the intensive nature of the programs and the limited number of positions available.

What's the hardest surgery to go? One of the most complex surgeries that patients can undergo is surgery related to the liver, pancreas, and gastrointestinal system. The surgery itself is a lengthy and complex process and requires a team of specialists to carry out the operation.

What is the hardest branch of surgery? Neurosurgery is known to be particularly challenging because of the intricate nature of the nervous system and the significant risks involved in surgical procedures.

What is the riskiest surgery? A craniectomy is a type of brain surgery and one of the riskiest surgeries. This medical procedure involves the removal of part of your skull to relieve any pressure on your brain.

How difficult is it to match into general surgery? To shed some light on the matter, here are some numbers: In 2022, over 3,000 medical students applied to the categorical general surgery residency and 1,619 matched successfully for an overall 52.7% match rate (NRMP). For US grads, the numbers looked a bit better, with US

MDs matching at 81.60% and 61.50% for US DOs.

What is the match rate for general surgery in 2024? In general surgery (designated as “Surgery: Categorical” within the NRMP data), for example, 1,717 positions were offered across the US in 2024, and 1,712 were filled, representing a 99.7% match rate.

What is the average number of interviews for general surgery residency? In 2021, the median number of interviews received was 19 and attended was 16.

What is the smartest doctor specialty? Internal Medicine: When society generally thinks of doctors, they are thinking of internists. They are often the smartest and most well- rounded physicians due to the breadth of knowledge they (along with family medicine physicians) often carry.

What doctor has the easiest residency? Easiest Doctor to Become: Family Doctor
The simple answer is that it takes the least amount of time. After your four years at medical school, (or a 3-year medical school) you can do a three-year family medicine residency, pass your board exams, and that's it, you're a doctor!

What is the most skilled surgical specialty? Cardio and thoracic surgeons specialize in surgeries of the chest. Cardiothoracic surgery ranks among the most high-intensity of surgeon specialties, as this area of the body includes some of the most vital and life-giving organs—the heart and lungs.

How hard is it to match general surgery? To shed some light on the matter, here are some numbers: In 2022, over 3,000 medical students applied to the categorical general surgery residency and 1,619 matched successfully for an overall 52.7% match rate (NRMP). For US grads, the numbers looked a bit better, with US MDs matching at 81.60% and 61.50% for US DOs.

What is the match rate for general surgery? In general surgery (designated as “Surgery: Categorical” within the NRMP data), for example, 1,717 positions were offered across the US in 2024, and 1,712 were filled, representing a 99.7% match rate.

How much research for general surgery? A categorical position offers a full residency training that is required to become a Board-Certified Physician. For

general surgery, this is usually a 5-years long program. On top of that, some programs offer 1-2 or even 3 years of dedicated research, making it a 6 to 8 years program.

What is the average publications for ortho match? Overall, the class of 2027 orthopedic surgery residents had a higher average number of total publications (4.12 vs. 1.31, p-value 0.01), a higher average number of orthopedic-specific publications (2.55 vs. 0.61, p-value 0.01), a higher average number of first authorships (1.11 vs.
