The gap is the discrepancy between these states, highlighting areas for improvement.

**What are the methods used for gap analysis?** The four steps of a gap analysis are: Identify the current situation. Define what is important for you in your department or organization. A sales team might be focused on lead generation and conversion

rates while the accounting department may be focused on efficiency and accuracy.

**What are the two types of gap analysis?** Gap analysis broadly falls into two categories: strategic and operational. Strategic gap analysis looks at the gaps in business planning. For example, the finance manager runs a gap analysis of Q2 sales targets: What's the closing rate today, and is it enough to reach the goal by the end of the quarter?

**What are the three 3 fundamental components of a gap analysis?** The three fundamental components of a gap analysis are the current state, desired state, and the gap. The current state is how business procedures and processes are being used. The desired state is where the company wants to be in the future. This usually includes improved efficiency and effectiveness.

**What is a gap analysis ISO standard?** A Gap Analysis is an assessment of your current system against the requirements of the standard. The gap analysis identifies areas where your system does not meet the requirements and is usually conducted as part of a process for assessing the readiness of your business's system for certification.

**What is the key purpose of gap analysis?** A gap analysis is performed to understand where a company may be lagging against its goals or objectives. It's a form of analysis that evaluates what it will take for a company to get from its current position to its future dream state.

**What is gap analysis in SAP?** In SAP world or in Information Technology world, gap analysis is the study of the differences between two different information systems or applications( ex; existing system or legacy system with Client and new is SAP), often for the purpose of determining how to get from one state to a new state.

**What is the gap analysis of KPI?** The "gap" in your gap analysis is the variance between the KPIs of your current state and your desired future state. For example, you have a gap of 50% between your current community awareness (20%) and your desired future state (70%).
