**How many cabin crew and flight attendants are needed for an A330?** The average number of cabin crew on A330-200s around the world at the moment is 246, under the 50 seat rule that would mean 5 cabin crew, under the door rule, it still means 8 cabin crew. The above aircraft would be certified for a maximum of 375 or 406 passengers, depending on if Door 3 is type A or Type 1.

**What is the minimum cabin crew for EASA?** “One per 50 seats” element of operational rule (ORO. CC. 100) – requires 9 cabin crew members. However, a seating capacity of 400 or fewer seats – requires only 8 cabin crew members in accordance with “One per 50 seats” element of operational rule (ORO.

**What is the minimum cabin crew for the A320?** The minimum cabin crew is 5 for the A321, 4 for the A320 and standard A319, or 3 for an A319 with row 26 removed or seat blockers fitted. Cabin crew are not required if operating a non-commercial flight with less than 19 passengers. One Cabin Crew member will be nominated by the company as Senior Cabin Crew Member.

**What is the difference between A330 and A340?** While retaining several common features, the two differ on one key point: the number of engines. While the A340 is a quad-engine aircraft, the A330 is a twin-engine jet. The former entered service in March 1993, and the latter in January 1994. This strategy is not surprising given the time, of their launches.

**How many flight attendants are on an Airbus A320?** A regional jet carrying 55 passengers requires 2 flight attendants. For a standard Boeing 737 or Airbus A320 with approximately 180 passengers, 5 flight attendants are needed. Similarly, a large

Boeing 747 accommodating over 400 passengers would require 10 or more flight attendants.

**Does A330 have crew rest?** On slightly older aircraft, such as the Airbus A330, the crew rest compartment can also be in the cargo hold, so a staircase would lead down instead. But on even older planes such as the Boeing 767, the rest areas are located in the main cabin, and are just recliner seats with curtains around them.

**Is EASA harder than FAA?** It might take longer but you'll meet a lot of characters and grow your network. Let's take a look at the difficulty level of the FAA ratings and the schematics of getting to the right seat of that jet: The difficulty level is lower than getting that EASA training.

**How to get EASA cabin crew attestation?** You can renew your certification by completing an adapted training program that is shorter and less costly than the initial training. After successfully passing the exam, you will obtain the CABIN CREW ATTESTATION Issued in accordance with the official EASA Form 142 Issue 1.

**Is EASA more strict than FAA?** EASA requires a minimum of 200 flight hours, while FAA requires a minimum of 250 flight hours. Additionally, EASA licenses have stricter medical requirements than FAA licenses, and EASA requires pilots to pass an additional language proficiency exam.

**How many flight attendants does the Airbus A330 900 have?**

**How many flight attendants are on a 777-300?** On a Boeing 777-300ER that would translate to 10 crew. But on these types of long distance flights, there will normally be another 2-3 crew out of which one will be the purser or cabin-crew in charge (CCIC). On long flights, the crew has to take rest breaks so there must be enough crew during the rotation period.

**How many flight attendants are required per flight?** The number of flight attendants required on flights is mandated by each country's regulations. In the US, for light planes with 19 or fewer seats, or, if weighing more than 7,500 pounds, 9 or fewer seats, no flight attendant is needed; on larger aircraft, one flight attendant per 50 passenger seats is required.

**How many people can fly on A330?**
