Scattered Hegemonies, Postmodernity, and Transnational Feminist Practices

By Inderpal Grewal, April 1994

Question 1: What is the main argument of Grewal's article?

- Grewal argues that the concept of hegemony is too rigid and monolithic in traditional feminist theory. She proposes a more nuanced understanding of hegemony that recognizes its "scattered" and fragmented nature in postmodernity.

Question 2: How does postmodernity challenge the traditional concept of hegemony?

- Postmodernity introduces a decentralized and fractured reality, where power is not concentrated in a single hegemonic force. Instead, it is scattered

across multiple sites and subjectivities. This complicates the notion of a singular feminist resistance movement.

Question 3: What are transnational feminist practices?

- Transnational feminist practices are those that transcend national boundaries and connect women across cultures and continents. These practices challenge traditional understandings of feminism as Western-centric and explore the experiences of women from marginalized and subaltern communities.

Question 4: How do transnational feminist practices critique scattered hegemonies?

- Transnational feminist practices expose the fragmented and uneven nature of power relations globally. They demonstrate that hegemonic discourses are not universally dominant but are constantly contested and reconfigured in different contexts.

Question 5: What is the significance of Grewal's work for contemporary feminist theory?

- Grewal's article provides a critical examination of the concept of hegemony and expands the scope of feminist analysis to include transnational perspectives. Her work has influenced feminist scholarship on globalization, intersectionality, and the construction of feminist knowledge.
