The Devil's Elixir: A Conversation with Raymond Khoury

The Devil's Elixir, the third installment in Raymond Khoury's Templar series, is a thrilling adventure that explores the intersection of history, science, and religion. We sat down with the author to discuss the book and its intriguing themes.

Q: What inspired you to write The Devil's Elixir?

Khoury: I've always been fascinated by the Knights Templar and their legendary secrets. In this book, I wanted to explore the idea of a hidden manuscript containing forbidden knowledge, and the dangerous consequences of its discovery.

Q: The book delves into the world of alchemy and ancient rituals. How did you research these topics?

Khoury: I spent years studying historical texts and consulting with experts in alchemy and medieval history. I wanted to create a realistic portrayal of these ancient practices and their potential implications in the modern world.

Q: The Devil's Elixir explores the tension between science and faith. What do you see as the relationship between these two realms?

Khoury: Science and faith can often seem at odds, but I believe they can also coexist in a complementary way. Through the characters in the book, I explore the idea that scientific discovery and religious belief can both lead to profound truths and inspire human action.

Q: The book features a diverse cast of characters, including Templars, scientists, and a female warrior. What motivated your character choices?

Khoury: I wanted to create a rich tapestry of personalities that would represent the complex world of the book. Each character brings their own unique perspective and background to the story, and their interactions drive the plot forward in unexpected ways.

Q: What do you hope readers will take away from The Devil's Elixir?

Khoury: I hope it will spark curiosity, wonder, and a desire to explore the hidden depths of history and human nature. Ultimately, I want readers to be entertained, but also to ponder the profound questions that the book raises about the nature of knowledge, faith, and the limits of human ambition.
