What We Owe to Each Other: A Conversation with T.M. Scanlon

In his book "What We Owe to Each Other," T.M. Scanlon argues that we have a moral obligation to treat others with respect and dignity. He bases this obligation on the idea that all human beings are equal in rational capacities and in their need for basic goods.

1. What is Scanlon's argument for the moral obligation to treat others with respect and dignity?

Scanlon argues that we have a moral obligation to treat others with respect and dignity because all human beings are equal in rational capacities and in their need for basic goods. We should respect others because they are capable of making their own decisions and because they have the same basic needs as we do. We should treat others with dignity because they are human beings who are worthy of our respect.

2. What are some of the ways in which we can treat others with respect and dignity?

There are many ways in which we can treat others with respect and dignity. Some of these ways include: listening to them, considering their perspectives, treating them with compassion, and helping them when they are in need.

3. Why is it important to treat others with respect and dignity?

Treating others with respect and dignity is important for a number of reasons. First, it is the right thing to do. All human beings deserve to be treated with respect and dignity, regardless of their race, gender, religion, or other characteristics. Second, treating others with respect and dignity makes us better people. When we treat others with respect, we are more likely to be treated with respect in return. Third, treating others with respect and dignity creates a more just and equitable society. When we all treat each other with respect, we are less likely to engage in conflict and more likely to cooperate.

4. What are some of the challenges to treating others with respect and dignity?

There are a number of challenges to treating others with respect and dignity. One challenge is that we often have our own biases and prejudices. These biases and prejudices can make it difficult for us to see others as truly equal to us. Another challenge is that we live in a world that is often very competitive. This competitiveness can make it difficult for us to treat others with the respect and dignity that they deserve.

5. How can we overcome the challenges to treating others with respect and dignity?

There are a number of things that we can do to overcome the challenges to treating others with respect and dignity. One thing that we can do is to become more aware of our own biases and prejudices. Once we are aware of our biases, we can take steps to correct them. Another thing that we can do is to practice treating others with respect and dignity in our everyday lives. The more we practice, the easier it will become.
