Does Java 9 exist? The Java Platform, Standard Edition 9 Development Kit (JDK 9) is a feature release of the Java SE platform. It contains new features and enhancements in many functional areas.

What are the features of Java 9 over Java 8? Java 8 has Java Time API and Java IO improvements, whereas Java 9 has Money and Currency API updates. Java 8 has other features, such as an extension to the Comparator interface, whereas Java 9 has improved Javadoc documentation and the Java platform module system.

What is different in Java 9? Java 9, released in September 2017, brought significant changes to the language, including the introduction of the module system and JShell, a Read-Eval-Print Loop (REPL) tool. String Methods: Added several useful methods to the String class, including `isBlank()`, `lines()`, and `strip()`.

Why is there no Java 9 and 10? The risk of upgrading was higher than the potential benefits, thus not giving much reason for developers to start using Java 9/10. Because Java 9 and 10 are no more supported. If you like to have security updates more than 6 months, you have to use Long Term Support (LTS) release like 8 or 11.

Is Java being phased out? Java continues to be a popular and relevant language in the software development industry. Several trends will continue to shape Java development, including DevOps, cloud computing, GitHub, VS Code adoption, artificial intelligence (AI), Spring Framework, and mobile/Android development.

Is Java 8 discontinued? The official end of public updates for Java 8 was in January 2019. However, extended support for commercial users under Oracle's Java SE Support program was made available until December 2030. It's recommended to check with the official Java website or Oracle for the most up-to-date information on Java 8 support.

What is the main goal of Java 9? The main goals for Java 9 are to: Make the Java Standard Edition platform, and the JDK, more navigable to scale down for small computing devices. Improve the overall security and maintain not only the JDK but the Java Implementations in general. Allow overall improved application performance.

Is Java 8 compatible with Java 9? Binary Compatibility Java SE 9 is binary-compatible with Java SE 8 except for the incompatibilities listed below. Except for the noted incompatibilities, class files built with the Java SE 8 compiler will run correctly in Java SE 9.

Why is Java 8 so good? New Features: Java 8 introduced several powerful features and enhancements, such as Lambda Expressions, Streams API, Optional Class, and improved Date/Time API. These features make Java code more concise, expressive, and functional, aligning with modern programming paradigms.

How do I switch to Java 9?

How do I get Java 9?

When was Java 9 released?

What Java was discontinued? Since Java 9 (as well as versions 10, and 12–16, and 18–20) are no longer supported, Oracle advises its users to "immediately transition" to a supported version.

How to migrate Java 8 to Java 9?

Why Java 11 over 8? Applications written in Java 11 are faster and more secure than Java 8 as it upgraded to support TLS 1.3, which is more secure than the previous versions. Also, CORBA and Java EE modules have been removed from Java 11 to tackle security issues. So, one should upgrade from Java 8 to Java 11.

Why is Java losing popularity? It's growing less and less likely that they will want to use Java. This is because of its licensing system. Jansen says "Oracle's commercial license strategy of Java causes a lot of confusion," and unlike the past there are plenty of viable alternatives.

Why is Java becoming obsolete? However, there are a number of strong reasons to abandon Java for other languages. There is a quantitative argument for moving away from Java: JavaScript is so much easier to scale than Java and allows you to write code inside scripts, as well as use class-less languages.

Who will replace Java? Java is being replaced with Node.js, Kotlin, Scala etc, and C++ is being replaced with Golang, Rust, etc.

Does Java exist anymore? As of March 2024, Java 22 is the latest version. Java 8, 11, 17, and 21 are previous LTS versions still officially supported.

Why are companies still stuck with Java 8? There's a mix of different reasons some companies are still stuck with Java 8. To name a few: Build tools (Maven, Gradle etc.) and some libraries initially had bugs with versions Java versions > 8 and needed updates.

Which Java version to use in 2024? Newer Java versions now follow every 6 months. Hence, Java 21 is scheduled for September 2023, Java 22 for March 2024 and so on. In the past, Java release cycles were much longer, up to 3-5 years.

When did Java 9 come out?

Is there a Java 10? With Java 10, Oracle has open-sourced the root certificates in Oracle's Java SE Root CA program in order to make OpenJDK builds more attractive to developers and to reduce the differences between those builds and Oracle JDK builds.

- **Negative impact on society:** Some argue that the dominance of large tech companies has led to a decline in innovation, competition, and social cohesion.

What are the potential consequences of the tech lash?

The tech lash has the potential to have a significant impact on the tech industry and society as a whole. Some potential consequences include:

- **Increased regulation:** Governments are considering new regulations to limit the power of big tech companies. This could include antitrust laws, privacy protections, and measures to address the spread of misinformation.
- **Reduced innovation:** If large tech companies are subject to more regulation, it could stifle innovation. This could have a negative impact on the economy and on the development of new technologies.
- **Changes in the way we use technology:** The tech lash could lead to changes in the way we use technology. People may become more mindful of their privacy and more critical of the information they consume online.

What is the future of the tech lash?

It is difficult to say what the future of the tech lash will be. However, it is clear that there is a growing movement to address the negative impacts of large tech companies. It is likely that this movement will continue to grow in the years to come.
