**What is the height in feet of the basket above the floor crossword?** Two baskets, one at each end of the court, hang 10 feet above the floor.

**What player guards the cage?** The goalkeeper is the last line of defense and must protect the goal cage area. The goalkeeper is the only player allowed to touch the ball with their body, but they can only do this within the shooting circle.

**How many feet is the basket above the floor?** The baskets are always 3.05 meters (10.0 ft) above the floor (except possibly in youth competition). Basketball courts have a three-point arc at both baskets. A basket made from behind this arc is worth three points; a basket made from within this line, or with a player's foot touching the line, is worth 2 points.

**What is the height of the basket from the ground?** Expert-Verified Answer. a. The height of the basket from the floor is 86.60 m.

**What shot causes the puck to leave the ice?**

**Why does Bedard wear a fishbowl?** "I was saying, 'Maybe I need a fishbowl to see some of the stuff he's seeing out there. ' He's seeing plays that most guys just don't see and that's the most special quality he has." IIHF rules dictate that Bedard must wear additional facial protection, because he's still just 17.

**What's it called when the referee drops the puck between two players to start a game?** Face-off: the method of starting play; the dropping of the puck by the official between the sticks of two opposing players standing one stick length apart with stick

blades flat on the ice; used to begin each period or to resume play when it has stopped for other reasons.

**When one grabs the ball after a missed shot?** In basketball, a rebound, sometimes colloquially referred to as a board, is a statistic awarded to a player who retrieves the ball after a missed field goal or free throw.

**How far is a free throw?** A free throw line shall be drawn (2" wide) across each of the circles indicated in the court diagram. It shall be parallel to the end line and shall be 15' from the plane of the face of the backboard.

**How tall is the top of the backboard from the floor?** What is the height of a backboard? The top of the hoop is 10 feet (305 cm) above the ground. Regulation backboards are 72 inches (183 cm) wide by 42 inches (110 cm) tall. All basketball rims (hoops) are 18 inches (46 cm) in diameter.

**What height basketball hoop for a 9 year old?** An eight-foot basket for ages 7-8 and a nine-foot basket for ages 9-11, when possible. Lowering the basket height for younger players assists with developing proper shooting form and increases the opportunity for shooting success.

**How many steps away is the free throw line?** The free throw line is 15 feet from the front of the backboard and is the same for all types of courts. The key or the free throw lane is 16 feet wide for NBA or FIBA and 12 feet wide for college, high school, and junior high basketball.

**At what height must a basketball ring be?** Some leagues for young children play on shorter hoops, but from junior high schools through the professional leagues, the game is played on hoops of the standard 10-foot height.

**What is the height of the peach baskets above the floor?** Naismith nailed the peach baskets to the lower rail of the gymnasium balcony, one on each side. The height of that lower balcony rail happened to be 10 feet.

**How high are the baskets from the floor?** Throughout gyms, parks, and driveways around the world, basketball hoops are almost always 10 feet (3 meters) off the ground. Some leagues for young children play on shorter hoops, but from junior high schools through the professional leagues, the game is played on hoops of the

standard 10-foot height.

**Is the basket feet above and parallel to the floor in basketball?** Each basket ring shall be securely attached to the backboard with its upper edge 10' above and parallel to the floor and equidistant from the vertical edges of the board.

**Who is the person trained in rocket flight?** /?æstr??n?t/ An astronaut is someone who travels in space. While the term was once reserved for military-trained professionals, recent accessibility of space travel has seen the term astronaut now used to refer to anyone traveling in a spacecraft, including civilians.

### **Smile and Sisters: The Box Set by Raina Telgemeier**
