Tactics for Listening: Third Edition, Unit 1 Text

Question: What are the six critical listening skills?

Answer:

1. **Selective listening:** Focusing on relevant information and ignoring distractions.
2. **Active listening:** Paying close attention, asking questions, and providing feedback.
3. **Inferential listening:** Drawing inferences and making connections based on what is heard.
4. **Critical thinking:** Evaluating information, identifying bias, and forming judgments.
5. **Reflective listening:** Summarizing, paraphrasing, and clarifying to demonstrate understanding.
6. **Global listening:** Understanding the overall message, main points, and supporting details.

Question: What is the purpose of selective listening?

Answer:

To filter out distractions and focus on the most important or relevant information. This skill is crucial in environments with high levels of background noise or multiple speakers.

Question: Why is active listening important in interpersonal communication?

Answer:

Active listening builds rapport, demonstrates respect, and fosters understanding. It shows the speaker that you are engaged and interested in what they have to say. By asking clarifying questions and providing feedback, you also encourage the speaker to continue sharing information.

Question: How does inferential listening contribute to comprehension?

Answer:

Inferential listening allows you to fill in gaps in the spoken message by making inferences based on what you hear. This skill is essential for understanding the speaker's intent and meaning beyond the literal words used.

Question: What is the role of global listening in presentations?

Answer:

Global listening helps you grasp the overall structure and key points of a presentation. By paying attention to the introduction, body, and conclusion, you can follow the speaker's train of thought and identify the most important ideas they are trying to convey.
