Is book yellowing normal? Most of the paper is made from wood which consists of cellulose and lignin. These components are high oxidizing agents and hence turn to yellow when exposed to oxygen over time. Indeed, your books dislike sunlight. The UV rays present in the light prompt and encourage the action of the oxidation process.

What is foxing in books? Foxing is an age-related process of deterioration that causes spots and browning on old paper documents such as books, postage stamps, old paper money and certificates. The name may derive from the fox-like reddish-brown color of the stains, caused by the rust chemical ferric oxide which may be involved.

Why do some books yellow faster than others? Newsprint paper that is prepared in a more inexpensive way turns yellowish even faster. The reason? It got additional lignin than refined paper. Although you might not avert your book's pages from being yellow forever, with proper care, you can keep them intact for a long time, even, maybe for a lifetime!
