Serway Modern Physics 3rd Edition Solution: Question and Answer

Question 1: A particle of mass m is confined to a one-dimensional infinite potential well of length L . Find the energy of the particle in the ground state.

Solution: The wave function for the ground state is given by

$$\psi(x) = \sqrt{\frac{2}{L}} \sin\left(\frac{\pi x}{L}\right)$$

The energy of the particle is given by

$$E = \frac{h^2}{8mL^2}$$

Question 2: A hydrogen atom is in the 2p state. What is the probability of finding the electron at a distance r from the nucleus?

Solution: The radial wave function for the 2p state is given by

$$R_{2p}(r) = \frac{1}{4\sqrt{2\pi} a_0^3} \left(\frac{r}{a_0}\right) e^{-\frac{r}{2a_0}}$$

The probability of finding the electron at a distance r from the nucleus is given by

$$P(r) = 4\pi r^2 |R_{2p}(r)|^2 = \frac{1}{8\pi a_0^3} \left(\frac{r}{a_0}\right)^2 e^{-\frac{r}{a_0}}$$

Question 3: What is the de Broglie wavelength of a proton with a kinetic energy of 1 MeV?

Solution: The de Broglie wavelength is given by

$$\lambda = \frac{h}{p}$$

where p is the momentum of the particle. The kinetic energy of the proton is given by

$$K = \frac{1}{2}mv^2$$

where v is the velocity of the proton. The momentum of the proton is given by

$$p = mv$$

Substituting the expression for p into the equation for the de Broglie wavelength, we get

$$\lambda = \frac{h}{\sqrt{2mK}}$$

Question 4: What is the uncertainty in the position of an electron with an uncertainty in its momentum of $1 \text{ eV}/c$?

Solution: The uncertainty in the position of an electron is given by

$$\Delta x \geq \frac{h}{4\pi m \Delta p}$$

where Δp is the uncertainty in the momentum of the electron. Substituting the given values into the equation, we get

$$\Delta x \geq \frac{6.63 \times 10^{-34} \text{ J s}}{4\pi (9.11 \times 10^{-31} \text{ kg})(1 \text{ eV}/c)}$$

$$\Delta x \geq 3.99 \times 10^{-10} \text{ m}$$

Question 5: What is the half-life of a radioactive isotope with a decay constant of 0.01 s^{-1} ?

Solution: The half-life of a radioactive isotope is given by

$$t_{1/2} = \frac{\ln 2}{\lambda}$$

where λ is the decay constant. Substituting the given value into the equation, we get

$$t_{1/2} = \frac{\ln 2}{0.01 \text{ s}^{-1}}$$

$$t_{1/2} = 69.3 \text{ s}$$

Your Boss Is Not Your Mother: 8 Steps to Ending Office Drama and Fostering Positive Workplace Relationships

Office drama can create a toxic work environment, hindering productivity and morale. To foster positive relationships and eliminate drama, it's crucial to understand that your boss is not your mother. Here are eight practical steps to help you achieve this:

- 1. Set Clear Boundaries:** Define your role and responsibilities clearly. When colleagues or subordinates overstep these boundaries, politely remind them of the limits.
- 2. Avoid Gossip and Triangulation:** Resist the temptation to engage in gossip or spread rumors. If someone tries to confide in you about another coworker, steer clear of participating.
- 3. Practice Active Listening:** When communicating with colleagues, give them your undivided attention. Paraphrase their words to ensure understanding and avoid misinterpretation.
- 4. Focus on Solutions, Not Problems:** Instead of dwelling on issues, shift your mindset towards finding constructive solutions. Be part of the solution rather than part of the problem.
- 5. Practice Empathy:** Try to understand the perspectives of others, even if you don't agree with them. This helps foster compassion and reduces misunderstandings.
- 6. Seek Guidance from Your Boss (Appropriately):** If you're struggling with a workplace conflict, consider seeking guidance from your boss. Be respectful of their time and present the situation professionally.
- 7. Prioritize Positive Interactions:** Make an effort to connect with colleagues on a personal level. Share positive news, offer support, and show appreciation for their contributions.
- 8. Set an Example:** Your behavior sets the tone for the workplace. Be a role model for professionalism, respect, and positive communication.

By following these steps, you can create a more harmonious and productive work environment. Remember, your boss is not your mother; they are your professional supervisor. By respecting boundaries, avoiding drama, and fostering positive relationships, you can cultivate a workplace where everyone thrives.
