

OF MICE AND MEN ANSWER

CHAPTER 2

[Download Complete File](#)

What happens in chapter 2 of Of Mice and Men? In Chapter 2 of Of Mice and Men, George and Lennie arrive at the ranch they are going to work on, and they go to the bunkhouse. They meet Candy, the boss, Curley, Curley's wife, Slim, and Carlson. Candy tells them about Curley being newly married and mean.

What words were used by the men to refer to Curley's wife? Curley's wife is usually referred to as a tramp, tart, or a looloo by the men on the ranch. In the story, her name isn't mentioned, instead called "Curley's wife". In this story, she portrays a female's sexuality in a world where there are only men.

Why was the boss angry when George and Lennie showed up at the bunkhouse? The next morning, George and Lennie arrive at the ranch and go to the bunkhouse. The old swamper, Candy, informs them the boss is mad because they were supposed to arrive the night before.

What is your impression of slim? Slim is a very likable character in Of Mice and Men who everyone on the ranch seems to respect. When we first meet Slim, John Steinbeck writes: He was a jerkline skinner, the prince of the ranch.... There was a gravity in his manner and a quiet so profound that all talk stopped when he spoke.

Why does George get mad at Lennie in chapter 2? After the boss leaves, why is George angry with Lennie? He told Lennie to not say a word, but he did which almost lost them their jobs. Lennie said, "strong as a bull."

Why does Curley hate Lennie? Curley does not seem to like anyone, especially not Lennie, because Lennie is big and strong. Curley doesn't like big guys because

he is a small guy himself. One day Curley hits Lennie, without any good reason. First Lennie did not do anything, but then he hit back, as George requested.

Why was Lennie shaking Curley's wife? He clings to her and gets mad that she is yelling, so he shakes her, which breaks her neck. He runs away, and George and Candy, another worker on the farm, find Curley's wife's body. Curley is enraged and wants to kill Lennie, and he thinks Lennie has stolen a gun. The men go in search of Lennie.

Why is Curley's wife referred to as a girl? She is always referred to in relation to Curley, implying she has no identity outside of her marriage. As the only 'developed' female character in the novella it is interesting she is never given a proper name as it highlights the deep rooted inequality prevalent in the 1930s, especially in rural America.

What does Candy call Curley's wife? After he leaves, Candy tells George and Lennie about Curley and Curley's wife. He says that Curley is a small insecure man who hates big men, and he calls Curley's wife a "tart."

What excuse does George give for Lennie's slowness in chapter 2? Answer and Explanation: When George and Lennie first arrive at their new ranch hand job, George speaks on Lennie's behalf so often that the boss wonders why. George explains that Lennie is his cousin and that he got kicked in the head by a horse as a child, resulting in his mental retardation.

How is slim described in chapter 2 Of Mice and Men? Slim, for example, is the sensitive, compassionate man whose word is law. Everyone respects him, and he seems to be the only one who is capable of understanding why George and Lennie travel together.

What does Lennie want in chapter 2? In the second chapter of the novella, Lennie overhears Slim talking about the litter of pups his dog has just delivered. Lennie grows very excited about the prospect of owning one of Slim's puppies, and he begs George to ask Slim if it would be ok if he could have one.

What is a jerkline skinner on a ranch? Jerkline Skinner: Lead driver of a team of mules. Stable Buck: A derogatory name for an African-American man who works in

the stables. Stetson Hat: A famous brand of hats, especially cowboy hats. Stetson Hat. ?Swamper: A general assistant; handyman.

Why is Slim so respected on the ranch? Slim is the most respected character on the ranch, despite not actually being in charge (although he is in charge of one of the grain teams). He is calm and thoughtful; all of the other men look up to him and value his opinions.

What does "jerkline skinner" mean? A jerkline skinner is the main driver of a mule team who handles the jerkline (reins).

What happened in CH-2 Of Mice and Men?

Why does Lennie want to leave the ranch in chapter 2? Lennie does not want to be at the new ranch he is scared. Lennie wants to leave but George says they have to wait just a bit until they get some money. Lennie does not feel safe where they are. Once they have money they could leave because George wants to keep Lennie safe.

How is candy described in chapter 2? Candy is "a tall, stoop-shouldered old man He was dressed in blue jeans and carried a big push-broom in his left hand." His right hand is simply a stump because he lost his hand in a ranch accident. Now the owners of the ranch keep him on as long as he can "swamp" out or clean the bunkhouse.

Why does Curley wear a Vaseline glove? Curley wears a "glove fulla Vaseline" on one hand because, according to Candy, "he's keepin' that hand soft for his wife." Since farm work is physical and tough on a person's hands, the Vaseline will prevent at least one of Curley's hands from becoming chapped and rough—something he clearly believes his wife would find ...

Is Curley to blame for Lennie's death? Lennie would suffer regardless with George even if he came to see him in prison. Lennie has no way out in this so George did the right thing by putting Lennie out of his misery by killing him. Curley would not just kill Lennie he would have made him suffer by torturing him because Lennie had humiliated Curly twice.

What is Curley afraid of? Curley fears losing power over the workers, and almost everyone fears Curley.

Is Lennie autistic? *Of Mice and Men* remains a staple text in schools in both the United States and United Kingdom, where both neuro-typical and disabled pupils encounter it. The character of Lennie has learning difficulties and also—as identified by some researchers—exhibits many characteristics of autism.

What did Lennie do to the girl? George also confides in Slim about Lennie's trouble in Weed: When Lennie touched a girl's dress, the girl screamed. Lennie got so scared that George had to hit him with a fence post to get him to let go. The girl claimed she had been raped, and so Lennie and George hid in an irrigation ditch and left in the night.

Why did George shoot Lennie? Answer and Explanation: The reason George shoots Lennie at the end of *Of Mice and Men* is because Lennie killed Curley's wife. If George did not shoot Lennie, the large man would either be shot in the stomach by Curley, a slow and painful death, or locked up in an institution.

Why is Lennie happy at the end of Chapter 2? At the end of chapter 2, Lennie is as excited as a little child about Slim's puppies. Lennie wants George to ask Slim if he can have a brown and white puppy. Chapter 3 is about relationships. The author's purpose is to show how unusual George and Lennie's relationship is for this time period.

What is George doing throughout the scene in chapter 2? Final answer: George is reading a book throughout the scene in Chapter 2.

Who is Candy in chapter 2 Of Mice and Men? Candy is an older, one-handed man who lives and works on the ranch that George and Lennie arrive at in the beginning of *Of Mice and Men*. He is the outcast of the workers on the ranch. He is older than them, and he is nearing the end of his productiveness.

How is Curley's wife presented in chapter 2? She had full, rouged lips and wide-spaced eyes, heavily made up. Her fingernails were red. Her hair hung in little rolled clusters, like sausages. She wore a cotton house dress and red mules, on the insteps of which were little bouquets of red ostrich feathers.

Why does Lennie end up killing Curley's wife? He accidentally killed a puppy, and he is scared that George will get angry and say he can't have rabbits. Later, when Lennie is touching Curley's wife and she screams, Lennie is scared George will get mad if he hears her. Lennie ends up killing her, and then he runs away.

Why is Lennie obsessed with dead mice? Why does Lennie have a dead mouse in his pocket? As the story begins, Lennie has a dead mouse in his pocket because he likes to pet soft things but doesn't know his own strength and accidentally killed the mouse when he pet it too hard.

Why did Curley beat up Lennie? One day, Lennie is smiling while thinking about a dream he had. Curley sees Lennie's friendly smile and assumes Lennie is laughing at him. Curley attacks Lennie in retaliation.

What happened in chapter 2 of Of Mice and Men?

How is Slim described in chapter 2 Of Mice and Men? Slim, for example, is the sensitive, compassionate man whose word is law. Everyone respects him, and he seems to be the only one who is capable of understanding why George and Lennie travel together.

What excuse does George give for Lennie's slowness in chapter 2? Answer and Explanation: When George and Lennie first arrive at their new ranch hand job, George speaks on Lennie's behalf so often that the boss wonders why. George explains that Lennie is his cousin and that he got kicked in the head by a horse as a child, resulting in his mental retardation.

How is Carlson described in chapter 2? Carlson is physically described as being "powerful, big-stomached...and thick-bodied..." His entire description is centered around his physical appearance rather than his personality; which can easily go unnoticed.

What is the conflict between George and Curley in chapter 2? As George and Lennie prepare to leave, Curley appears again, looking for his wife, and hurries off angrily when they tell him where she went. George expresses his dislike for Curley, and comments that he is afraid he will "tangle" with Curley himself.

What happens to Candy's dog in Chapter 2? Candy doesn't want to let his dog go since it is his one remaining companion, but Carlson eventually convinces him that killing the dog is an act of kindness. The death of Candy's dog foreshadows Lennie's death at the end of *Of Mice and Men*.

How is Candy described in chapter 2? Candy is "a tall, stoop-shouldered old man He was dressed in blue jeans and carried a big push-broom in his left hand." His right hand is simply a stump because he lost his hand in a ranch accident. Now the owners of the ranch keep him on as long as he can "swamp" out or clean the bunkhouse.

Does Curley hit his wife? According to the quote, Curley 's wife does not like her own husband! She was forced into marrying a guy she doesn 't truly love. Curly would abuse her, use her as bragging rights, and never spend time with his wife. Curley even had a glove filled with Vaseline so one of his hands could be soft for touching his wife.

Why was George mad at Lennie? In *Of Mice and Men*, George is constantly upset with Lennie because of Lennie's impact on his life. First, he complains that Lennie forgets everything, so George has to spend his days repeating information to Lennie that Lennie will only forget. Then, George complains that Lennie always wants "what we ain't got."

Su Endocrino en 1 Minuto: La Solución a Su Metabolismo Lento

¿Tiene sobrepeso o dificultades para perderlo? ¿Siente cansancio y fatiga constantes? Si es así, es posible que tenga un metabolismo lento. Aquí tiene un resumen rápido de las causas, los síntomas y el tratamiento de un metabolismo lento, proporcionado por su endocrinólogo en 1 minuto.

¿Qué Causa un Metabolismo Lento?

Un metabolismo lento puede deberse a una variedad de factores, como:

- **Desequilibrio hormonal:** Las hormonas tiroideas regulan el metabolismo. Un nivel bajo de estas hormonas puede provocar un metabolismo lento.
- **Edad:** El metabolismo tiende a ralentizarse naturalmente con la edad.

- **Factores genéticos:** Algunas personas tienen una predisposición genética a tener un metabolismo lento.
- **Dieta y estilo de vida:** Una dieta rica en alimentos procesados y baja en actividad física puede ralentizar el metabolismo.

Síntomas de un Metabolismo Lento

Los síntomas de un metabolismo lento pueden incluir:

- Aumento de peso o dificultad para perderlo
- Fatiga y cansancio
- Estreñimiento
- Intolerancia al frío
- Piel seca y cabello quebradizo

Tratamiento para un Metabolismo Lento

El tratamiento para un metabolismo lento dependerá de la causa subyacente. Puede incluir:

- **Tratamiento hormonal:** Si el metabolismo lento es causado por un desequilibrio hormonal, su endocrinólogo puede recetar medicación para regular sus niveles hormonales.
- **Cambios en la dieta y el estilo de vida:** Una dieta saludable y equilibrada, junto con el ejercicio regular, puede ayudar a estimular el metabolismo.
- **Otros tratamientos:** En algunos casos, su endocrinólogo puede recomendar otros tratamientos, como suplementos o medicamentos recetados.

Conclusión

Si sospecha que tiene un metabolismo lento, es importante consultar a un endocrinólogo para un diagnóstico y tratamiento adecuados. Con el tratamiento adecuado, puede restaurar su metabolismo a niveles normales y mejorar su salud y bienestar general.

Wohlers Report 2016: Unraveling the Latest Industry Insights

Q: What key findings does the Wohlers Report 2016 present?

A: The report highlights a \$5.1 billion global additive manufacturing market in 2015, with an expected growth to \$21.2 billion by 2020. It also reveals a significant increase in material revenue, driven by expansions in the aerospace and medical sectors.

Q: How does the report assess the market size and growth potential?

A: Wohlers Report estimates that the total installed base of industrial-grade 3D printers reached 33,000 units in 2015. It forecasts that the market will expand rapidly, with a compound annual growth rate (CAGR) of 25.9% between 2015 and 2020.

Q: What are the key industry trends identified in the report?

A: The report emphasizes the growing adoption of additive manufacturing in various industries, particularly in medical, automotive, and aerospace. It also highlights the emergence of low-cost 3D printers and the increasing availability of materials.

Q: What challenges does the industry currently face?

A: The report acknowledges challenges such as high production costs, limited material properties, and the need for skilled workforce. It emphasizes that addressing these challenges is crucial for the industry's continued growth.

Q: What are the future prospects for additive manufacturing?

A: Wohlers Report anticipates a promising future for additive manufacturing. It predicts that the technology will continue to gain acceptance and become an integral part of product development and manufacturing processes. The report also highlights the potential for new applications, such as 3D printing of organs and tissues.

Top 10 Marketable Diploma Courses in Kenya: A Career Point

Question: What are the most in-demand diploma courses in Kenya?

OF MICE AND MEN ANSWER CHAPTER 2

Answer: Top 10 marketable diploma courses in Kenya include:

1. Business Administration
2. Information Technology
3. Hospitality Management
4. Supply Chain Management
5. Marketing
6. Human Resource Management
7. Accounting
8. Nursing
9. Community Health
10. Social Work

Question: Why should I consider pursuing a diploma course?

Answer: Diploma courses offer several benefits, including:

- Career advancement opportunities
- Enhanced skills and knowledge
- Increased earning potential
- Recognition in the job market
- Flexibility and affordability

Question: What are the career prospects for diploma holders?

Answer: Diploma holders have a wide range of career options, such as:

- Management positions
- Administrative roles
- Technical specialists
- Customer service representatives
- Marketing professionals
- Accountants and auditors
- Nurses and healthcare workers

- Social workers and community organizers

Question: Where can I find reputable institutions offering diploma courses in Kenya?

Answer: Several reputable institutions in Kenya offer top-notch diploma courses, including:

- Kenya Polytechnic University College
- Technical University of Kenya
- The Institute of Human Resource Management
- Kenya Institute of Management
- Kenyatta University

Question: How can I enhance my employability with a diploma qualification?

Answer: To increase your employability with a diploma qualification, you can:

- Develop strong soft skills such as communication, problem-solving, and teamwork
- Gain practical experience through internships or volunteering
- Obtain relevant certifications or micro-credentials
- Build a professional network through industry events and social media
- Showcase your skills through a well-crafted CV and LinkedIn profile
