**Can I still get Johnson outboard parts?** Boats.net makes it easy for you to find the Johnson outboard parts you need. We've got them all by year, and we've got them by horsepower, so you can find your parts.

**How do I tell what year my 15 hp Johnson outboard motor is?** Not sure about the year of your outboard motor? The serial number can help you determine the year of your engine. Your serial number or model number can be found on the engine's mid-section. Often this plate is also marked with the engine's year too.

**How can you tell how old a Johnson outboard is?** The actual year is found in the model number, not the serial number. For example, 150TXL78 is a 150hp engine from 1978. 65ESLR72 would be from 1972. For engines prior to 1969 refer to the Johnson 1960-1979 serial number year chart located [here](#).

**What year did Johnson outboards go out of business?** It has been owned since 2001 by the Canadian firm Bombardier Recreational Products. Bombardier stopped selling outboards under the Johnson brand after 2007, and moved all sales entirely to Evinrude Outboard Motors until they were discontinued in June 2020.

**Are Evinrude and Johnson the same?** In 1936 the Evinrude company merged with the Johnson Motor Company to form the Outboard Marine Corporation.

**What should I replace on an old outboard motor?** Old or worn-out fuel pump diaphragms and check valves can contribute to difficulty starting an outboard motor. Fortunately, replacing the fuel lines and rebuilding the fuel pump and carburetors with modern, ethanol-resistant components is a straightforward solution.

**How can I tell what year my engine is by the serial number?** The date code for the engine is built into the serial number after the first two numbers. As an example, a 2013 engine would read something like this, 1013426. The “13” designates it as a 2013 engine.

**How to read a Johnson outboard model number?** Your Johnson outboard model number can usually be found on the nameplate located on the motor or the mounting bracket. The nameplate should contain a model number and a serial number. The model number will identify the year and certain details of that motor.

**How do I know what HP my outboard motor is?** The horsepower is usually painted in large numbers on the motor itself. Sometimes the horsepower is part of the model code. If you are unsure check the manual or ask your repairer.

**Can you tell a year by a serial number?** For the serial number the typical format is to have the 4th, 5th, and 6th characters to reference when the product was built. The first character is the year date (Y) and the next two (WW), the week in that year it was made. Hope this helps you and answers your questions.

**How can I tell how old a boat is?**

**Do outboard motors have a VIN?** Locating the serial number on outboards is usually simple. On a Mercury outboard, you'll usually have the serial number located on the starboard side of the swivel bracket, the mounting bracket or the cylinder head in sticker form.

**Are old outboards worth anything?** Outboard motors, similar to wooden boats, are valued by the simple laws of supply and demand. Yet, some fairly common models like Mercury kg-7 “Super 10” and Johnson 5 hp green TD models are fairly pricey in restored condition. Some rare, often low horse power, brands like Flambeau or Elgin are easy to bargain for.

**Can you still get Johnson outboard parts?** Outboard Parts Inventory MarineEngine.com keeps thousands of Johnson Evinrude parts in stock. We offer current Johnson Evinrude OEM parts, the largest selection of old stock OEM parts and quality discount aftermarket parts by Sierra Marine, Mallory Marine, CDI Electronics and more.

**Are Johnson outboards good?** They are very reliable engines, I have owned 4 boats all powered by Johnson outboards and have had zero issues with them. I would say they are just as reliable as the Yamahas. However, IMO the Yamahas of the same vintage are smoother, and more efficient than the Johnsons. They are very good engines.

**Are 2-stroke outboards better than 4-stroke?** Because they have fewer parts, 2-stroke motors are generally smaller and lighter than 4-stroke motors. Lighter weight also allows 2-stroke engines to run faster. As a result, when making a 2-stroke vs. 4-stroke outboard power comparison, 2-stroke motors usually win out.

**Is Evinrude coming back?** The boating world was shocked when in May 2020, it was announced that iconic Evinrude Outboard Motors would immediately stop production. Canadian parent company Bombardier Recreational Products had purchased the failing company, then called Outboard Marine Corporation, in a post-bankruptcy sale in 2001.

**Why did Evinrude stop making boat motors?**

**Should you flush your outboard motor after every use?** Flushing your outboard motor after every saltwater use is a small yet impactful practice that pays dividends in the long run. By incorporating this routine into your post-boating ritual, you're not just preventing corrosion but safeguarding your marine engine's performance and longevity.

**Is it worth fixing an old outboard?** Deciding whether to fix up an old, tired engine best comes down to cost and how much enjoyment you hope to experience. If working on mechanical marvels floats your boat, you can save some dollars and have some fun working the Lazarus magic. But we must think again if it risks lives at sea with a dodgy rebuilt engine.

**Which outboard lasts the longest?** Outboards from big brands (Yamaha, Mercury, Honda, ePropulsion, etc) tend to have longer boat motor hours life.

**Are parts still available for Evinrude outboard motors?** You can obtain Evinrude parts and accessories from your authorized dealer, or using our online store. You can access the online store [here](#).

**Why is there a shortage of outboard motors?** The pandemic, combined with the war in Ukraine, has interrupted shipping worldwide and created shortages in everything from the wiring looms that connect an outboard engine's electronics to the microchips that control them. Related content: All the 115hp outboard engines compared.

**Are Evinrude outboard motors still being made?** We are proud to have supplied you with outboard engines over the past 110 years. For business reasons, we have made the difficult and thoughtful decision to discontinue manufacturing of our outboard engines to focus on the next generation of propulsion.

**How good is a Johnson outboard motor?** They are very reliable engines, I have owned 4 boats all powered by Johnson outboards and have had zero issues with them. I would say they are just as reliable as the Yamahas. However, IMO the Yamahas of the same vintage are smoother, and more efficient than the Johnsons. They are very good engines.
