What is the economic way of thinking in economics? What is an economic thinker? Economics is the study of choice in using scarce resources that have alternative uses. What are the four elements of the economic way of thinking? Four key economic concepts—scarcity, supply and demand, costs and benefits, and incentives—can help explain many decisions that humans make.

What is an example of economic thinking? Cost and Benefit Suppose, for example, that Alicia Hyfield, an average everyday run-of-the-mill college student, is contemplating the purchase of a new computer.
