### **How to apply eyeshadow step by step?**

**How do I choose the right eyeshadow?** Depending on your skin tone, you can pick your best eyeshadow palette that emphasizes your undertone. If you have a warm skin tone, use golds, oranges, and reds to emphasize the warmth in your skin. Those with cool skin tones should go with blues, greens, and purples to match the undertones of their skin.

### **How do you apply 3 step eyeshadow?**

**When to apply eyeshadow?** “I recommend doing eyes first because that way if there's any fallout from the eyeshadow, you can clean it up before starting the complexion without having to redo foundation and concealer.” She also adds that it gives your skin care time to fully absorb first before layering face makeup on top.

**How to use eyeshadow palette for beginners?** When applying eyeshadow, use a light hand and build up color gradually. Apply a mid-tone shade across the entire lid first. Then use a darker color on the outer third of the lid and along the lashline. Blend well to avoid harsh lines.

**What type of eyeshadow is best for beginners?** Powder eyeshadows are hands down the most common type of eyeshadow that you will come across. And if you are an eye makeup beginner, this is the right type of eyeshadow for you to start with. Here you must know that pressed powder eyeshadows are the easiest to blend.

**How to know what eyeshadow colors go together?** One of the best ways to pick a combo is to select two complementary colors. Green and red, blue and orange, or purple and yellow. These shades really pop when worn together and will call a lot of attention to your eyes. Try different shades of the same color.

**How to apply eyeshadow for beginners with fingers?** Take a clean finger (again, your ring finger is best) and gently pat side to side to blend out the deeper shade and create a smoky look. “As you blend, you want all of your eyeshadow to stay between the outer corner of your eye and your brow line so that your eyes look lifted,” explains Maryam.

**How do you blend eyeshadow step by step?** Move your brush back and forth across the crease of your eye like a windshield wiper, blending the color horizontally. Gradually move the brush downward toward the base color, keeping the brush moving in the same back-and-forth motion.

**How to do simple eye makeup step by step?**

**How to apply powdered eye shadow?** Apply with fingertips or choose your favorite makeup brush. If using a brush, be sure not to load it up when applying—whisk the brush across the shadow 2-3 times, then tap off any excess powder in a clean tissue before brushing onto lids from the inner to the outer corner of the eyes. Voila! Eyeshadow applied.
