Michael Porter proposed three generic competitive strategies that companies can adopt:

1. **Cost Leadership:** Focus on achieving the lowest costs in the industry.
2. **Differentiation:** Create a unique product or service that is perceived as valuable by customers.
3. **Focus:** Target a specific niche market with a specialized product or service.

Porter's Industry Analysis

Porter's Five Forces industry analysis framework helps companies assess the competitive landscape of their industry. These forces include:

1. **Threat of New Entrants:** How easy or difficult is it for new competitors to enter the industry?
2. **Bargaining Power of Suppliers:** How much power do suppliers have to influence prices and terms?

3. **Bargaining Power of Buyers:** How much power do buyers have to influence prices and terms?
4. **Threat of Substitute Products:** What is the likelihood that customers will switch to alternatives?
5. **Rivalry Among Existing Firms:** How intense is the competition between existing companies?

Porter's Five Forces and Competitive Strategy

By understanding the industry environment using the Five Forces analysis, companies can develop strategies to?? the competitive forces and gain an advantage. For example:
