### **Star Gods of the Maya: Astronomy, Art, Folklore, and Calendars**

The ancient Maya civilization was renowned for its sophisticated astronomy and complex calendar systems. The Maya believed that celestial bodies, including stars, played a significant role in their lives. This belief was reflected in their art, folklore, and calendars, which featured numerous star gods and their associated myths and rituals.

**Q: Who were the star gods of the Maya?** A: The Maya had several star gods, each associated with a specific constellation or celestial body. The most prominent included Itzamna, the creator god; Kinich Ahau, the sun god; Chaac, the rain god; and Kukulcan, the feathered serpent god.

**Q: How were star gods depicted in Maya art?** A: Star gods were often depicted as anthropomorphic figures, adorned with elaborate headdresses and clothing that symbolized their celestial connections. They were often shown interacting with other deities, performing rituals, or carrying attributes associated with their cosmic powers.

**Q: What role did folklore play in the Maya's understanding of star gods?** A: Folklore played a vital role in transmitting knowledge about star gods. The Popol Vuh, a sacred text of the Maya, contains myths and legends that provide insights into the origin and nature of these celestial beings. These stories explained how the star gods were created, their relationships with other deities, and their influence on human affairs.

**Q: How did the Maya incorporate star gods into their calendars?** A: The Maya developed a complex system of calendars that incorporated astronomical observations. The Mesoamerican Long Count Calendar, for instance, tracked time based on cycles of 260 days (the tzolkin) and 365 days (the haab). The calendars included information about celestial events, such as solar eclipses and the positions of stars, which were used to predict agricultural cycles, religious festivals, and political events.

**Q: What is the Linda Schele Series in Maya and Pre-Columbian Studies?** A: The Linda Schele Series in Maya and Pre-Columbian Studies is a prestigious academic series dedicated to the study of Maya civilization and the broader Pre-Columbian cultures of Mesoamerica. The series publishes original research by leading scholars in the field, focusing on topics related to art, architecture, epigraphy, iconography, and the social and intellectual history of the Maya.

### **1. What is the purpose of Sun Java Application Server documentation?**

Sun Java Application Server (Sun JAS) documentation provides comprehensive information on the installation, configuration, administration, and troubleshooting of Sun JAS. It is essential for developers, architects, and administrators who need to understand and use Sun JAS effectively.

### **2. Where can I find Sun JAS documentation?**

Sun JAS documentation is available online at Oracle's website. The documentation is divided into several modules, each covering a specific aspect of Sun JAS. These modules include:

- Getting Started
- Installation Guide
- Administration Guide
- Developer's Guide
- Troubleshooting Guide

### 3. How is Sun JAS documentation structured?

Sun JAS documentation is written in a modular fashion, allowing users to quickly navigate to the information they need. Each module is divided into chapters, topics, and subtopics. The documentation also includes a comprehensive index and search feature.

### 4. What types of help are available in Sun JAS documentation?

Sun JAS documentation provides several types of help, including:

- Conceptual explanations of concepts and technologies
- Step-by-step instructions on how to perform tasks
- Troubleshooting tips and solutions
- Examples and tutorials
- Reference information

### 5. How do I stay up-to-date with Sun JAS documentation?

Oracle regularly updates Sun JAS documentation to reflect new features and enhancements. To stay up-to-date with the latest documentation, users can subscribe to the Oracle Java EE Product Newsgroup. Additionally, users can check the Oracle website for the latest documentation updates.
