Is Rush a Republican?

Why did Rush Limbaugh go deaf? The ear specialists I consulted about Limbaugh's disorder say that his addiction to certain pain killers could have caused the problem. Apparently, two of the drugs to which he became addicted --and which

he obtained illegally, shame, shame on him-- are known to be ototoxic, that is, they damage the inner ear.

How many months is one term in college? On a semester system, there are two main terms in the academic year, Fall and Spring, each lasting around 15 to 17 weeks, or about four months. Schools may offer condensed Winter and Summer terms between the semesters, which may last anywhere from 3 to 12 weeks.

What are the university semesters in the USA? During a typical academic year, there are two formal semesters — the fall and spring semesters. The academic year starts in the fall semester and runs from August or September to December, with various breaks such as fall break, Thanksgiving break and winter break.

What is one year of university called? At college or university, freshman denotes students in their first year of study. The grade designations of high school are not used, but the terms sophomore, junior, and senior are kept at most schools. Some colleges, including historically women's colleges, do not use the term freshman but use first year, instead.

What does one term mean in college? One-term is completion within the first term of enrollment in the discipline. The one-year timeframe includes students who completed a transfer-level class within one year (365 days) of their initial attempt in the sequence (e.g., Fall-[Winter]-Spring-Summer; Spring-Summer-Fall-[Winter]; etc.).

Is a term 1 or 2 semesters? The semesters are often divided into two terms each.

How long is 2 semesters in university? A semester is the basic unit of time by which an academic year is divided under a "semester system." As for how many semesters in a year, an academic year of this system is typically divided into two such semesters—consisting of a total of 15 weeks each.

How long is one semester in university usa? A college semester typically consists of 15 to 17 weeks of instruction, with the last week of the semester devoted to final exams. Most universities break the academic year into two semesters—fall and spring.

How long is 4 semesters in college? How Long Is a Community College Semester? Community college semesters are usually 14-16 weeks long, the same length as those at four-year colleges. Program administrators design associate degrees to take two years, or four semesters.

Is 4 months a semester? The semester system divides your college year into two primary parts: the fall semester, followed by a winter break, and the spring semester, followed by a summer break. The fall and spring semesters stretch over about 15 to 16 weeks each, which translates to about four months.

What degree do you get for 6 years? Most applied doctorates take 3-5 years, while a Ph. D. typically requires 4-6 years of coursework.

How old are freshmen? Great question. The 'normal' or average age for a student to start their freshman year of high school is usually around 14 or 15 years old, depending on when your birthday is. Usually, most students will be 14, but some may have just turned 15 at the end of the summer, just before the start of school.

What is 4 years of college called? Bachelor's or Baccalaureate Degree Bachelor's degrees require students to complete four- or five-year programs in a specific academic discipline. The two most common types of bachelor's degrees are bachelor of arts (BA) and bachelor of science (BS).

How many months are in one semester? A college semester is 15 weeks, which is just shy of four months. Typical trimester terms are three months, and quarters are about two and a half months long. Accelerated courses are usually finished in two months or less.

How do semesters work in college? A semester system generally consists of two 15-week terms: one in the fall (followed by a winter break) and one in the spring (followed by a summer break). The average full-time student takes 4-5 courses per term, or roughly 15 credits. A semester school year typically starts in late August and concludes in early May.

What is a term vs. semester? For the most part, the word "term" is used because not all schools use semesters. Semester literally means "six months" (or at least that's the root meaning). Some schools use quarters, and in that case, term will refer

to one quarter. Other schools use trimesters, and in that case, term will refer to one trimester.

How long is a term for college? A college semester typically consists of 15 to 17 weeks of instruction, with the last week of the semester devoted to final exams. Most universities break the academic year into two semesters—fall and spring.

How long is one term? A semester is typically 15 weeks long, while a term can be anywhere from six to 18 weeks long. Another difference between semesters and terms is how they are structured.

How long is 4 terms in college? A semester system generally consists of two 15-week terms, while a quarter system consists of four 10-week sessions. A quarter system consists of four 10-week sessions in the fall, winter, spring, and summer.

How many terms are in a year for college? There are two semesters in an academic year, separated by a break during the U.S. winter and an even longer break for summer. Academic quarters divide the year into four terms, with the first three together lasting the equivalent of two semesters.
