Risk-based IOSA delivers an audit scope that will be tailored for each airline.

Why risk-based IOSA? Risk-Based IOSA promises to take a more nuanced approach, tailoring the audit scope to each airline's specific needs and vulnerabilities. This means focusing on areas where the potential for safety hazards is highest, leading to a more efficient and effective use of auditing resources.

How many airlines are certified IOSA? the U.S. Federal Aviation Administration (FAA), Transport Canada, and the European Union Aviation Safety Agency (EASA). As of April 2024, 431 airlines are listed on the IOSA registry, including 102 that are not IATA members.
