**Is Gastroenterology and hepatology peer reviewed?** Journal of Gastroenterology and Hepatology is produced 12 times per year and publishes peer-reviewed original papers, reviews and editorials concerned with clinical practice and research in the fields of hepatology, gastroenterology and endoscopy.

**What is the relationship between hepatology and Gastroenterology?** While those words sound very different, they're actually more similar than you'd think! Hepatology is a subspecialty of Gastroenterology, meaning that often, physicians practice both. Gastroenterology is a branch of medicine focused on the digestive system and its disorders.

**What is endoscopy in hepatology?** In essence, endo-hepatology consists of two pillars: one focusing primarily on disorders of the liver parenchyma, vascular disorders, and portal hypertension, which is mainly captured via EUS, while the other targets the hepatobiliary tract via endoscopic retrograde cholangiopancreatography and advanced imaging.

**What is the abbreviation for Indonesian journal of Gastroenterology Hepatology and Digestive endoscopy?** The Indonesian Journal of Gastroenterology, Hepatology and Digestive Endoscopy (INA JGHE) adapts guidelines from Committee on Publication Ethics (COPE) for its publication ethics.

**What is the short name for clinical gastroenterology and hepatology?** Clinical Gastroenterology and Hepatology (CGH) publishes clinical articles on all aspects of the digestive system, including the liver and pancreas.

**What is the impact factor of CMGH?** To round things out, Cellular and Molecular Gastroenterology and Hepatology (CMGH), AGA's basic and translational open-access journal maintained a strong position in the field with an impact factor of

8.797, placing it 17th in the category and second among non-clinical journals.

**What is the difference between a gastroenterologist and hepatologist?** The gastroenterologist treats digestive system issues: as diseases that affect the oesophagus, stomach, gallbladder, pancreas, liver, intestines, colon, and rectum, whereas the hepatologists treat the liver, gallbladder, pancreas, and bile ducts.

**Can a gastroenterologist detect liver problems?** Both a hepatologist and a gastroenterologist can help diagnose and treat liver disease. Chronic liver diseases are on the rise, as is liver cancer.

**Is hepatology to do with the liver?** Hepatology is an area of medicine that focuses on diseases of the liver as well as related conditions. A hepatologist is a specialized doctor involved in the diagnosis and treatment of hepatic diseases, which include issues that affect your: liver. gallbladder.

**What is the difference between endoscopy and gastroenterology?** A gastroscopy only views the oesophagus and upper GI tract, while endoscopy is performed to examine many body structures, including joints, intestines, lungs, and the pelvis area. In fact, a gastroscopy is a type of endoscopy. During an endoscopy, the endoscope may be inserted through an incision.

**What is endoscopy treatment?** Endoscopy is a nonsurgical technique for treating conditions affecting any part of your digestive tract. With the help of a thin, flexible tube fitted with a light and camera (endoscope), we view video images of your gastrointestinal tract on a high-definition video monitor.

**What is the difference between a gastroscopy and an endoscopy?** An endoscopy is a procedure where a special camera is used to inspect the gastrointestinal tract. A gastroscopy looks inside the beginning of the gastrointestinal tract.

**Why is it called GI for gastroenterology?** The term gastrointestinal (GI) refers collectively to the organs of the body that play a part in food digestion. The gastrointestinal tract, also called the digestive tract or GI tract, includes the mouth, esophagus, stomach, small intestine, large intestine (colon), rectum and anus.

**What is GI and hepatobiliary?** The department of Gastroenterology and Hepatology Sciences provides comprehensive high-end care for a wide spectrum of gastrointestinal, pancreatic, liver and biliary disorders with the help of a highly qualified, experienced team of Gastroenterologists supported by the state-of-art technology.

**What is the Indonesia Society of gastroenterology?** The Indonesian Society of Gastroenterology (Perkumpulan Gastroenterologi Indonesia or PGI) is a professional organisation dedicated to gastroenterology research, practice, education and promotion in Indonesia.

**Why is it called hepatology?** A liver doctor is called a hepatologist. “Hepato” means “liver,” and “-ologist” is someone who specializes in something.

**What is the difference between gastrology and gastroenterology?** As per definition, a gastrologist is a person who specializes in gastrology. Gastrology involves stomach and stomach-related issues. However, gastrology is not a recognized branch of study and hence, gastrologist is just another term used for gastroenterologists, since the latter is difficult to pronounce.

**What is gastroenterology liver?** Gastroenterologists diagnose, treat and work to prevent gastrointestinal (stomach and intestines) and hepatological (liver, gallbladder, biliary tree and pancreas) diseases.

**What are good impact factors?** In general, an impact factor of 10 or higher is considered remarkable, while 3 is good, and the average score is less than 1. The very prestigious journal Nature had an impact factor of 69.504 in the year 2021. ??

**What is the impact factor of f100research?** F1000Research started its publishing journey in 2012, having an H-index - 72, an impact factor (2021) - 3.23, an overall ranking of 4485, SCImago Journal Rank (SJR) – 0.939 ( Resurchify, 2023).

**What does impact factor tell you?** Impact Factors are used to measure the importance of a journal by calculating the number of times selected articles are cited within the last few years. The higher the impact factor, the more highly ranked the journal. It is one tool you can use to compare journals in a subject category.

**Is the Journal of Gastroenterology peer-reviewed?** World Journal of Gastroenterology (WJG, World J Gastroenterol) is a high-quality, online, open-access, single-blind peer-reviewed journal published by the Baishideng Publishing Group (Baishideng).

**Is BMC Gastroenterology peer-reviewed?** BMC Gastroenterology is an open access, peer-reviewed journal that considers articles on all aspects of the prevention, diagnosis and management of gastrointestinal and hepatobiliary disorders, as well as related molecular genetics, pathophysiology, and epidemiology.

**What is the Impact Factor of the Journal of Gastroenterology and hepatology Foundation?**

### **Uji Asumsi Klasik Regresi Linier Berganda**

Uji asumsi klasik pada regresi linier berganda sangat penting untuk memastikan validitas hasil analisis. Asumsi-asumsi ini meliputi:

- **Linearitas:** Hubungan antara variabel independen dan dependen harus linear.
- **Normalitas:** Residual (selisih antara nilai aktual dan nilai prediksi) harus berdistribusi normal.
- **Homoskedastisitas:** Variansi residual harus konstan untuk semua nilai variabel independen.
- **Multikolinearitas:** Variabel independen tidak berkorelasi tinggi satu sama lain.
- **Tidak adanya autokorelasi:** Residual dari satu pengamatan tidak berkorelasi dengan residual dari pengamatan lainnya.

### **Pertanyaan dan Jawaban**

**1. Mengapa penting menguji asumsi klasik?** Karena asumsi klasik membantu memastikan bahwa hasil regresi linier berganda tidak bias atau tidak akurat.

---

**2. Apa cara menguji linearitas?** Dengan membuat plot pencar antara variabel dependen dan independen. Jika titik-titik pada plot membentuk garis lurus, maka asumsi linearitas terpenuhi.

**3. Bagaimana cara menguji normalitas?** Dengan menggunakan uji Jarque-Bera atau uji Kolmogorov-Smirnov. Jika p-value uji ini lebih kecil dari 0,05, maka asumsi normalitas ditolak.

**4. Apa akibat homoskedastisitas?** Homoskedastisitas yang dilanggar dapat menghasilkan estimasi koefisien yang bias dan perkiraan kesalahan standar yang tidak dapat diandalkan.

**5. Apa dampak multikolinearitas?** Multikolinearitas dapat menyebabkan estimasi koefisien yang tidak stabil dan interpretasi yang sulit.
