**What is the IEC 60079 10 1 classification of areas?** The ATEX standard EN 60079-10-1 is concerned with the classification of areas where flammable gas or vapour hazards may arise and may then be used as a basis to support the proper selection and installation of equipment for use in hazardous areas.

**What is IEC hazardous area classification?** IEC and ATEX Standards A Hazardous Area is defined by three main criteria, these being: The type of hazard (groups) The auto-ignition temperature of the hazardous material (temperature or “T” rating) The likelihood of the hazard being present in flammable concentrations
