The Saxon Math 8/7 curriculum provides a rigorous foundation in mathematics for middle school students. The "Key Concepts" section at the beginning of each lesson includes essential questions that students should be able to answer after completing the lesson. Here are five key concepts from Lesson 8 of Saxon Math 8/7, along with their corresponding answers:

1. **Key Concept 1:** What is the formula for slope? **Answer:** Slope = (change in y) / (change in x)
2. **Key Concept 2:** What is the equation of a line given its slope (m) and y-intercept (b)? **Answer:** $y = mx + b$
3. **Key Concept 3:** How do you graph a line given its equation? **Answer:** Plot the y-intercept and use the slope to determine subsequent points on the line.
4. **Key Concept 4:** How do you write an equation of a line given two points on the line? **Answer:** Use the slope formula to find the slope, then substitute the slope and one of the points into the slope-intercept form ($y = mx + b$).
5. **Key Concept 5:** What is the slope-intercept form of a linear equation? **Answer:** $y = mx + b$, where m is the slope and b is the y-intercept.

By understanding and answering these key concepts, students can build a strong foundation for their mathematical studies in Lesson 8 and beyond. The Saxon Math 8/7 curriculum provides numerous practice problems and examples to help students reinforce these concepts and develop their mathematical proficiency.
