Understanding Rational Numbers and Integers in 7th Grade\*\*

### What are Rational Numbers and Integers?

- **Rational numbers:** Fractions (numbers that can be expressed as a quotient of two integers) and terminating or repeating decimals.
- **Integers:** Whole numbers (positive and negative) and 0.

### Units for 7th Grade Math

- Fractions (including equivalent and simplest forms)
- Decimals (including converting between decimals and fractions)
- Integers (operations and properties)
- Ratio and proportion

### Solving Rational Numbers

To solve problems involving rational numbers:

- Convert fractions and decimals to the same form if necessary.
- Perform operations (addition, subtraction, multiplication, division) according to the rules of fractions and decimals.

### Integers in 7th Grade

- Integers are used to represent quantities that can be positive, negative, or zero.
- Operations with integers follow specific rules, such as:
  - Addition: Signs the same, add the absolute values; Signs different, subtract the smaller absolute value from the larger.
  - Subtraction: Change the sign of the subtrahend and add.

### Additional Math Concepts

- **Normal 7th grade math:**
  - Number sense (whole numbers, fractions, decimals)
  - Algebra (expressions, equations)
  - Geometry (shapes, transformations)
- **7th grade in the USA:** Typically for 12- or 13-year-olds.
