Abbott ARCHITECT: A Comprehensive Guide**

What is the Abbott ARCHITECT method?

The Abbott ARCHITECT method is an automated immunoassay system that utilizes advanced chemiluminescent microparticle immunoassay (CMIA) technology to provide accurate and precise diagnostic results. It is designed to measure a wide range of analytes, including hormones, drugs of abuse, infectious agents, and cardiac markers.

What is the cost of Abbott ARCHITECT?

The cost of Abbott ARCHITECT varies depending on the specific model and configuration. The base system typically ranges from \$100,000 to \$200,000. Additional reagents, consumables, and services may also increase the overall cost.

What is the Abbott ARCHITECT i1000SR method?

The Abbott ARCHITECT i1000SR method is a fully automated CMIA analyzer designed for low-volume laboratories. It offers a compact design, ease of use, and a wide menu of assays.

What is the ARCHITECT c4000 method?

The ARCHITECT c4000 method is a high-throughput CMIA analyzer designed for large-volume laboratories. It features a high sample capacity, fast turnaround time, and a comprehensive menu of assays.

What is the architect rule?

In architecture, the architect rule states that the size of a building should be proportional to its intended use. This principle helps ensure that buildings are appropriately sized and functional for their specific purposes.

What is Abbott's correction formula?

Abbott's correction formula is a statistical method used to adjust the results of a diagnostic test when there is a known bias or error. It involves calculating a correction factor based on the known difference between the true and observed values.

How much is Abbott ci8200?

The Abbott ci8200 is a fully automated chemiluminescent immunoassay analyzer designed for medium-volume laboratories. Its cost typically ranges from \$150,000 to \$250,000.

Who is the most expensive architect in the world?

Norman Foster is considered one of the most expensive architects in the world. His firm, Foster + Partners, has designed iconic buildings such as The Gherkin in London and the Burj Khalifa in Dubai.

What is cheaper than an architect?

There are several options cheaper than hiring an architect, such as:

- Using a design-build firm
- Hiring a draftsman or designer
- Utilizing online design tools
- Working with a general contractor

What is the Abbott test method?

The Abbott test method refers to any immunoassay method developed and manufactured by Abbott Laboratories. This includes the Abbott ARCHITECT and ci8200 systems.

What is the Abbott method?

The Abbott method is a general term for the techniques and principles used by Abbott Laboratories in the development and manufacture of diagnostic tests.

What is the Abbott formula investigation?

The Abbott formula investigation refers to a statistical study conducted by Abbott Laboratories to determine the accuracy and precision of its diagnostic tests.

What is the ArchiMate method?

The ArchiMate method is an open-source architectural modeling language used to design, analyze, and document enterprise architectures. It provides a common framework for representing and integrating different aspects of an enterprise, including business processes, information systems, and technology infrastructure.
