What is open opportunity in economics? The concept of open opportunity in economics refers to a principle necessitating equal rights for all individuals to participate or compete in the marketplace. Open opportunity requires that everyone can choose to participate in market activities because of the theory of legal equality.

What is economics class 11? Economics is the study of scarcity and needs. It studies the limited resources which have alternative uses and ways to use these limited resources to meet society's unlimited wants. It is further divided into two, microeconomics and macroeconomics.

What are the different types of economics? Within the 3 main types of economies, economic decisions, big or small, can be made and applied with knowledge of the three main branches of economics known as applied economics, macroeconomics and microeconomics.

What is economics and how does it contribute to our understanding of how societies allocate resources? Economics is the study of how people allocate scarce resources for production, distribution, and consumption, both individually and collectively. The field of economics is connected with and has ramifications on many others, such as politics, government, law, and business.

What is an example of opportunity in economics? A student spends three hours and \$20 at the movies the night before an exam. The opportunity cost is time spent studying and that money to spend on something else. A farmer chooses to plant wheat; the opportunity cost is planting a different crop, or an alternate use of the resources (land and farm equipment).

What is the open opportunity? Open Opportunities is a government wide program offering professional development opportunities to current federal employees and internships to students. The program facilitates collaboration and knowledge sharing across the federal government.

What is economy class 12? (1) Economic activities These activities include investment, production, distribution, and consumption of goods and services at all levels within the society. The country where these economic activities are undertaken is known as an economy. Example: Workers work in a factory and get wages.

Who is the father of economics? Adam Smith is known as the father of economics for his pioneering ideas in the field of free gross domestic product and free trade. Also see: What is microeconomics?

What is economics all about in Grade 12? Grade 12 Economics The following topics make up each of the TWO exam papers that you write for the Economics examination: Macro-economics: Circular flow, Business cycles, Public sector, Foreign exchange markets, Protectionism and Free Trade. Micro-economics: Perfect markets, Imperfect markets, Market failure.

What are the 4 main economics? Each economy functions based on a unique set of conditions and assumptions. Economic systems can be categorized into four main types: traditional economies, command economies, mixed economies, and market economies.

What are the 5 basics of economics? The 5 basic economic principles include scarcity, supply and demand, marginal costs, marginal benefits, and incentives. Scarcity states that resources are limited, and the allocation of resources is based on supply and demand. Consumers consider marginal costs, benefits, and incentives when purchasing decisions.

What are the 3 major of economics? The 3 major theories of economics are Keynesian economics, Neoclassical economics, and Marxian economics. Some of the other theories of economics are monetarism, institutional economics, constitutional economics etc.

Who is the greatest economist? Adam Smith (1723–1790) Educated at the University of Glasgow at the age of 14, he went on to pioneer political economy and is now deemed the 'Father of Modern Economics'. Best known for his book *The Wealth of Nations*, Smith argued for free trade, market competition and the morality of private enterprise.

What are the three basic economic questions? Students will read and take notes on the three main questions of economics. These are what to produce, how to produce it, and who to produce it for.

Is economics a science or art? Economics is regarded a social science concerned about how an economy and its participants function and behave. Critical areas of focus within the field include how limited resources are allocated, and efficiency in the production and exchange of goods and services.

What is the meaning of opening opportunity? to create a new opportunity or possibility: A teaching qualification can open up many more career opportunities.

What is an example of an open economy? The industries available in this kind of economy are privately owned rather than owned by the government, which gives the industries the freedom to set their policies. Examples of a country with an open economy include; Singapore, Netherlands, Hong Kong, Finland, and New Zealand.

What does open mean in economics? An open economy is a type of economy where not only the domestic factors but also entities in other countries engage in trade of products (goods and services).

What is an example of an open market in economics? Some of the most well-known examples of open markets are stock exchanges, foreign exchange markets, and various commodity markets. Not all markets are completely open—many have characteristics of both open and closed markets.

Situated Learning: A Comprehensive Guide

Situated learning is a constructivist theory that emphasizes the importance of context in learning. It proposes that learning is not a passive process of receiving information, but rather an active process of constructing knowledge through

participation in meaningful social activities.

1. What is Situated Learning?

Situated learning is based on the premise that learning is situated in a particular context and that knowledge is constructed through interaction with the environment and social interactions. It emphasizes the importance of apprenticeship and participation in learning experiences that are authentic and relevant to real-world situations.

2. Key Concepts of Situated Learning

- **Legitimate Peripheral Participation:** Learners participate in a community of practice and gradually acquire knowledge and skills through observing and interacting with more experienced members.
- **Learning in Doing:** Knowledge is constructed through active engagement in tasks and activities that are embedded in social and cultural contexts.
- **Social Cognitive and Computational Perspectives:** Situated learning incorporates both social and cognitive perspectives, as well as computational models, to explain learning processes.

3. How Does Situated Learning Work?

Situated learning occurs in a community of practice where learners participate in meaningful activities. Through observation and interaction, they gradually acquire knowledge and skills. The focus is on learning in context, rather than on abstract or theoretical knowledge.

4. Examples of Situated Learning

- An apprentice working alongside an experienced craftsman to learn a trade.
- A student participating in a research project with a professor and other graduate students.
- A group of engineers collaborating to design a new product.

5. Benefits and Criticisms of Situated Learning

Benefits:

- Promotes deep understanding and transferable skills.
- Enhances motivation and engagement.
- Facilitates collaboration and teamwork.

Criticisms:

- Can be time-consuming and difficult to implement.
- May not be suitable for all learning contexts.
- Can lead to the perpetuation of existing social inequalities.
